#### Forward-Looking Statements

This Form 10-Q contains “forward-looking statements” within the meaning of the U.S. Private Securities Litigation Reform Act of 1995, including, without limitation, statements about Popular, Inc.’s (the “Corporation,” “Popular,” “we,” “us,” “our”) business, financial condition, results of operations, plans, objectives and future performance. These statements are not guarantees of future performance, are based on management’s current expectations and, by their nature, involve risks, uncertainties, estimates and assumptions. Potential factors, some of which are beyond the Corporation’s control, could cause actual results to differ materially from those expressed in, or implied by, such forward-looking statements. Risks and uncertainties include, without limitation, the effect of competitive and economic factors, and our reaction to those factors, the adequacy of the allowance for loan losses, delinquency trends, market risk and the impact of interest rate changes (including on our cost of deposits), capital markets conditions, capital adequacy and liquidity, and the effect of legal and regulatory proceedings and new accounting standards on the Corporation’s financial condition and results of operations. All statements contained herein that are not clearly historical in nature are forward-looking, and the words “anticipate,” “believe,” “continues,” “expect,” “estimate,” “intend,” “project” and similar expressions and future or conditional verbs such as “will,” “would,” “should,” “could,” “might,” “can,” “may” or similar expressions are generally intended to identify forward-looking statements.

Various factors, some of which are beyond Popular’s control, could cause actual results to differ materially from those expressed in, or implied by, such forward-looking statements. Factors that might cause such a difference include, but are not limited to:

- the rate of growth or decline in the economy and employment levels, as well as general business and economic conditions in the geographic areas we serve and, in particular, in the Commonwealth of Puerto Rico (the “Commonwealth” or “Puerto Rico”), where a significant portion of our business is concentrated;
- adverse economic conditions, including high levels of inflation, and geopolitical conditions, including wars and conflicts, that adversely affect housing prices, the job market, consumer confidence and spending habits which may affect, in turn, among other things, our level of non-performing assets, charge-offs and provision expense;
- changes in interest rates and market liquidity, which may reduce interest margins, impact funding sources, reduce loan originations, affect our ability to originate and distribute financial products in the primary and secondary markets and impact the value of our investment portfolio and our ability to return capital to our shareholders;
- the impact of bank failures or adverse developments at other banks and related negative media coverage of the banking industry in general on investor and depositor sentiment regarding the stability and liquidity of banks;
- the impact of the current fiscal and economic challenges of Puerto Rico and the measures taken and to be taken by the Puerto Rico Government and the Federally-appointed oversight board on the economy, our customers and our business;
- the amount of Puerto Rico public sector deposits held at the Corporation, whose future balances are uncertain and difficult to predict and may be impacted by factors such as the amount of Federal funds received by the P.R. Government and the rate of expenditure of such funds, as well as the financial condition, liquidity and cash management practices of the Puerto Rico Government and its instrumentalities;
- unforeseen or catastrophic events, including extreme weather events such as hurricanes and other natural disasters, man-made disasters, acts of violence, war or conflicts, or pandemics, epidemics and other health-related crises, or the fear of any such event occurring, any of which could cause adverse consequences for our business, including, but not limited to, disruptions in our operations;
- our ability to achieve the expected benefits from our transformation initiatives, including our ability to achieve projected earnings, efficiencies and return on tangible common equity and accurately anticipate costs and expenses associated therewith;
- our ability to execute capital actions, including with respect to share repurchases and dividends;
- the fiscal and monetary policies of the federal government and its agencies;
- changes in federal bank regulatory and supervisory policies, including required levels of capital, liquidity, resolution-related requirements and the impact of other proposed capital standards on our capital ratios;
- the impact of any future U.S. government shutdown;
- changes in and uncertainty regarding federal funding, tax and trade policies, and federal rulemaking, supervision, examination and enforcement priorities;
- adjustments to or additional Federal Deposit Insurance Corporation (“FDIC”) assessments;

[Table of Content](#)

- regulatory approvals that may be necessary to undertake certain actions or consummate strategic transactions, such as acquisitions and dispositions, or for the Corporation's subsidiaries to declare dividends, and the timing of such approvals;
- the relative strength or weakness of the consumer and commercial credit sectors and of the real estate markets in Puerto Rico and the other markets in which our borrowers are located;
- a deterioration in the credit quality of our clients, customers and counterparties;
- the performance of the stock and bond markets;
- competition in the financial services industry;
- possible legislative, tax or regulatory changes;
- a failure in or breach of our operational or security systems or infrastructure or those of Evertec, Inc., our provider of core financial transaction processing and information technology services, or of third parties providing services to us, including as a result of cyberattacks, e-fraud, denial-of-services and computer intrusion, that might result in, among other things, loss or breach of customer data, disruption of services, reputational damage or additional costs to Popular;
- changes in market rates and prices which may adversely impact the value of financial assets and liabilities;
- potential judgments, claims, damages, penalties, fines, enforcement actions and reputational damage resulting from pending or future litigation and regulatory or government investigations or actions;
- changes in accounting standards, rules and interpretations;
- our ability to grow our core businesses;
- decisions to downsize, sell or close branches or business units or otherwise change our business mix; and
- management's ability to identify and manage these and other risks.

Moreover, the outcome of any legal and regulatory proceedings, as discussed in "Part II, Item 1. Legal Proceedings," is inherently uncertain and depends on judicial interpretations of law and the findings of regulators, judges and/or juries. Investors should refer to the Corporation's Annual Report on Form 10-K for the year ended December 31, 2025 (the "2025 Form 10-K"), as well as "Part II, Item 1A" of our Quarterly Report on this Form 10-Q for a discussion of such factors and certain risks and uncertainties to which the Corporation is subject.

All forward-looking statements included in this Form 10-Q are based upon information available to Popular as of the date of this Form 10-Q and other than as required by law, including the requirements of applicable securities laws, we assume no obligation to update or revise any such forward-looking statements to reflect occurrences or unanticipated events or circumstances after the date of such statements.

**Basis of Presentation**

The (unaudited) interim Consolidated Financial Statements are, in the opinion of management, a fair statement of the results for the periods reported. The consolidated statement of financial condition presented as of December 31, 2025 was derived from audited Consolidated Financial Statements of the Corporation for the year ended December 31, 2025.

Certain information and notes to the financial statements disclosures which would normally be included in financial statements prepared in accordance with Accounting Principles Generally Accepted in the United States of America (U.S. GAAP), have been condensed or omitted from the unaudited financial statements pursuant to the rules and regulations of the Securities and Exchange Commission. Accordingly, these financial statements should be read in conjunction with the audited Consolidated Financial Statements of the Corporation for the year ended December 31, 2025, included in the 2025 Form 10-K. Operating results for the interim periods disclosed herein are not necessarily indicative of the results that may be expected for a full year or any future period.

**Use of Estimates in the Preparation of Financial Statements**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

| <i>FASB ASU 2025-05, Financial Instruments - Credit Losses (Topic 326) - Measurement of Credit Losses for Accounts Receivables and Contract Assets</i> | The Financial Accounting Standards Board (the "FASB") issued Accounting Standard Update ("ASU") 2025-05 in July 2025, which permits entities to elect a practical expedient when accounting for current accounts receivable and current contract assets arising from transactions accounted for under Accounting Standard Update ("ASC") Topic 606, Revenue from Contracts with Customers. This practical expedient establishes that, in developing reasonable and supportable forecasts as part of estimating expected credit losses, entities assume that current conditions as of the balance sheet date do not change for the remaining life of the asset.                                                                                                         | January 1, 2026         | The Corporation does not currently engage in transactions within the scope of this guidance. Accordingly, adoption did not have a material impact on the consolidated financial statements. Should the Corporation enter into such transactions in the future, the impact would be evaluated at that time. |
| <i>FASB ASU 2024-04, Debt—Debt with Conversion and Other Options (Subtopic 470-20) - Induced Conversions of Convertible Debt Instruments</i>           | The FASB issued ASU 2024-04 in November 2024, which clarifies the requirements for determining whether certain settlements of convertible debt instruments should be accounted for as an induced conversion. Also it makes additional clarifications to assist stakeholders in applying the guidance. The ASU clarifies that the incorporation, elimination, or modification of a volume-weighted average price ("VWAP") formula does not automatically cause a settlement to be accounted for as an extinguishment and that the induced conversion guidance applies to a convertible debt instrument that is not currently convertible as long as it had a substantive conversion feature as of both its issuance date and the date the inducement offer is accepted. | January 1, 2026         | The Corporation does not currently engage in transactions within the scope of this guidance. Accordingly, adoption did not have a material impact on the consolidated financial statements. Should the Corporation enter into such transactions in the future, the impact would be evaluated at that time. |

The update establishes a consistent measurement requirement for PIK dividends but does not address when such dividends should be recognized. It requires PIK dividends to be initially measured using the stated PIK dividend rate in the preferred stock agreement, generally applied to the liquidation preference of the preferred stock.       | January 1, 2027  | The Corporation does not currently engage in transactions within the scope of this guidance. [1] Includes \$14.3 billion pledged to secure government and trust deposits, assets sold under agreements to repurchase, credit facilities and loan servicing agreements that the secured parties are not permitted to sell or repledge the collateral, of which \$13.2 billion serve as collateral for public funds. The Corporation had unpledged Available for Sale securities with a fair value of \$6.3 billion that could be used to increase its borrowing facilities.

The weighted average yield on debt securities available-for-sale is based on amortized cost; therefore, it does not give effect to changes in fair value.

Debt securities not due on a single contractual maturity date, such as mortgage-backed securities and collateralized mortgage obligations, are classified based on the period of final contractual maturity. The expected maturities of collateralized mortgage obligations, mortgage-backed securities and certain other securities may differ from their contractual maturities because they may be subject to prepayments or may be called by the issuer.

At June 30, 2026, the Corporation did not intend to sell or believe it was more likely than not that it would be required to sell debt securities classified as available-for-sale. There were no debt securities classified as available-for-sale sold during the six months ended June 30, 2026 and 2025.

The following tables present the Corporation's fair value and gross unrealized losses of debt securities available-for-sale, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position at June 30, 2026 and December 31, 2025.

Debt securities available-for-sale in a continuous unrealized loss position for less than twelve months of \$17.3 billion as of June 30, 2026, compared to \$1.2 billion on December 31, 2025, are impacted by changes in market rates.

As of June 30, 2026, the portfolio of available-for-sale debt securities reflects gross unrealized losses of \$1.0 billion (December 31, 2025 - \$0.9 billion), driven mainly by mortgage-backed securities, which have been impacted by the interest rate environment and the portfolio's longer duration. The portfolio of available-for-sale debt securities is comprised mainly of U.S. Treasuries and obligations from the U.S. Government, its agencies or government sponsored entities, including Federal National Mortgage Association ("FNMA"), Federal Home Loan Mortgage Corporation ("FHLMC") and Government National Mortgage Association ("GNMA"). These securities carry an explicit or implicit guarantee from the U.S. Government, are highly rated by major rating agencies, and have a long history of no credit losses. Accordingly, the Corporation applies a zero-credit loss assumption.

[1] Book value includes \$293.0 million of unrealized loss which remains in Accumulated other comprehensive (loss) income (AOCI) related to certain securities transferred from available-for-sale securities portfolio to the held-to-maturity securities portfolio.

[2] Includes \$7.3 billion pledged to secure public and trust deposits that the secured parties are not permitted to sell or repledge the collateral. The Corporation had unpledged held-to-maturities securities with a fair value of \$98.8 million that could be used to increase its borrowing facilities.

Debt securities not due on a single contractual maturity date, such as collateralized mortgage obligations, are classified in the period of final contractual maturity. The expected maturities of collateralized mortgage obligations and certain other securities may differ from their contractual maturities because they may be subject to prepayments or may be called by the issuer.

#### Credit Quality Indicators

The following describes the credit quality indicators by major security type that the Corporation considers to develop the estimate of the allowance for credit losses for investment securities held-to-maturity.

As discussed in Note 2 of the 2025 Form 10-K, U.S. Treasury securities carry an explicit guarantee from the U.S. Government, are highly rated by major rating agencies and have a long history of no credit losses. Accordingly, the Corporation applies a zero-credit loss assumption and no allowance for credit losses ("ACL") for these securities has been established.

At June 30, 2026 and December 31, 2025, the "Obligations of Puerto Rico, States and political subdivisions" classified as held-to-maturity, included securities issued by municipalities of Puerto Rico that are generally not rated by a credit rating agency. The Corporation performs periodic credit quality reviews of these securities and internally assigns standardized credit risk ratings based on its evaluation. For the definitions of the obligor risk ratings, refer to the Credit Quality section of **Note 8** to the Consolidated Financial Statements. This includes \$7.1 million of general and special obligation bonds issued by three municipalities of Puerto Rico, of which \$6.3 million have a "Pass" rating, that are payable primarily from certain property taxes imposed by the issuing municipality ( compared to \$8.7 million and \$7.9 million , respectively, at December 31, 2025).

At June 30, 2026 , the portfolio of "Obligations of Puerto Rico, States and political subdivisions" also included \$34.8 million in securities issued by the Puerto Rico Housing Finance Authority ("HFA"), a government instrumentality, for which the underlying source of payment is second mortgage loans in Puerto Rico residential properties (not the government), but for which HFA provides a guarantee in the event of default and upon the satisfaction of certain other conditions ( December 31, 2025 - \$36.0 million). These securities are not rated by a credit rating agency. Refer to Note 16 to the Consolidated Financial Statements for additional information on the Corporation's exposure to the Puerto Rico Government.

[Table of Content](#)

A deterioration of the Puerto Rico economy or of the fiscal health of the Government of Puerto Rico and/or its instrumentalities (including if any of the issuing municipalities become subject to a debt restructuring proceeding under the Puerto Rico Oversight Management and Economic Stability Act ("PROMESA")) could adversely affect the value of these securities, resulting in losses to the Corporation.

At June 30, 2026, the portfolio of "Obligations of Puerto Rico, States and political subdivisions" had no securities issued by the HFA for which the underlying source of payment is U.S. Treasury securities (December 31, 2025 - \$6.8 million), as all such securities were fully redeemed during the quarter ended on March 31, 2026. Historically, the Corporation has applied a zero-credit loss assumption for these securities, and no ACL has been established for these securities given that U.S. Treasury securities carry an explicit guarantee from the U.S. Government, are highly rated by major rating agencies, and have a long history of no credit losses.

*Delinquency status*

At June 30, 2026 and December 31, 2025, there were no securities held-to-maturity in past due or non-performing status.

*Allowance for credit losses on debt securities held-to-maturity*

The allowance for credit losses related to the Obligations of Puerto Rico and the States and Political subdivisions securities at June 30, 2026 was \$6.2 million (December 31, 2025 - \$5.8 million).

**Note 7 - Loans**

For a summary of the accounting policies related to loans, interest recognition and allowance for credit losses refer to Note 2 - Summary of Significant Accounting Policies of the 2025 Form 10-K.

The Corporation has designated loans classified as collateral dependent for which the ACL is measured based on the fair value of the collateral less cost to sell, when foreclosure is probable or when the repayment is expected to be provided substantially by the sale or operation of the collateral and the borrower is experiencing financial difficulty. The fair value of the collateral is based on appraisals, which may be adjusted due to their age, type, location, and condition of the property or area or general market conditions to reflect the expected change in value between the effective date of the appraisal and the measurement date. Appraisals are updated every one to two years depending on the type of loan and the total exposure of the borrower.

Loans in non-accrual status with no allowance at June 30, 2026 include \$106.7 million in collateral dependent loans (December 31, 2025 - \$142.0 million). The Corporation recognized \$2.9 million in interest income on non-accrual loans during the six months ended June 30, 2026 (June 30, 2025 - \$3.0 million).

The following tables present the amortized cost basis of collateral-dependent loans, for which the ACL was measured based on the fair value of the collateral less cost to sell, by class of loans and type of collateral as of June 30, 2026 and December 31, 2025:

#### Note 8 - Allowance for credit losses – loans held-in-portfolio

The Corporation follows the current expected credit loss ("CECL") model to establish and evaluate the adequacy of the ACL to provide for expected losses in the loan portfolio. This model establishes a forward-looking methodology that reflects the expected credit losses over the lives of financial assets starting when such assets are first acquired or originated. In addition, CECL provides that the initial ACL on PCD financial assets be recorded as an increase to the purchase price, with subsequent changes to the allowance recorded as a credit loss expense. The provision for credit losses recorded in current operations is based on this methodology. Loan losses are charged and recoveries are credited to the ACL. The Corporation's modeling framework includes internally developed quantitative models that generate lifetime default and prepayment estimates as well as other loan level techniques to estimate loss severity. These models combine credit risk factors which include the impact of loan modifications, with macroeconomics expectations to derive the lifetime expected loss.

At June 30, 2026, the Corporation estimated the ACL by weighting the outputs of optimistic, baseline, and pessimistic scenarios. The weightings applied are subject to evaluation on a quarterly basis as part of the ACL's governance process. During the first quarter of 2026, among the three scenarios evaluated to estimate the ACL, the baseline scenario was assigned the highest probability, followed by the pessimistic scenario, where weight was increased during 2025 in response to ongoing uncertainties. There were no changes to the probability weights during the second quarter of 2026.

The following tables present the changes in the ACL of loans held-in-portfolio and unfunded commitments for the quarters and six months ended June 30, 2026 and 2025.

**Modifications**

A modification constitutes a change in loan terms in the form of principal forgiveness, an interest rate reduction, other-than-insignificant payment delay, term extension or combination of the above made to a borrower experiencing financial difficulty.

The amount of outstanding commitments to lend additional funds to debtors with financial difficulties owing receivables whose terms have been modified during the six months ended June 30, 2026 amounted to \$85.6 million (during the year ended December 31, 2025 - \$159.1 million), related to the commercial loan portfolios.

The following tables show the amortized cost basis of the loans modified to borrowers experiencing financial difficulties at the end of the reporting period disaggregated by class of financing receivable and type of concession granted for the quarters and six months ended June 30, 2026 and 2025. Loans modified to borrowers experiencing financial difficulties that were fully paid down, charged-off or foreclosed upon by period end are not reported.

The past due 90 days or more categories include all loans modified classified as non-accruing at the time of the modification. These loans will continue in non-accrual status, and presented as past due 90 days or more, until the borrower has demonstrated a willingness and ability to make the restructured loan payments (at least six months of sustained performance after the modification or one year for loans providing for quarterly or semi-annual payments) and management has concluded that it is probable that the borrower would not be in payment default in the foreseeable future.

[1] Loans that were in non-accrual status at the time of modification are presented as past due until the borrower has demonstrated a willingness and ability to make the restructured loan payments. Payment default is defined as a restructured loan becoming 90 days past due after being modified, foreclosed or charged-off, whichever occurs first. The recorded investment as of period end is inclusive of all partial paydowns and charge-offs since the modification date. Loans modified with financial difficulty that were fully paid down, charged-off or foreclosed upon by period end are not reported.

The following tables present, by class, the performance of loans that have been modified during the twelve months preceding June 30, 2025.

#### Credit Quality

The risk rating system provides for the assignment of ratings at the obligor level based on the financial condition of the borrower. The risk rating analysis process is performed at least once a year or more frequently if events or conditions change which may deteriorate the credit quality. In the case of consumer and mortgage loans, these loans are classified considering their delinquency status at the end of the reporting period.

The following tables present the amortized cost basis, net of unearned income, of loans held-in-portfolio based on the Corporation's assignment of obligor risk ratings as defined at June 30, 2026 and December 31, 2025 and the gross write-offs recorded by vintage year. For the definitions of the obligor risk ratings, refer to the Credit Quality section of Note 8 to the Consolidated Financial Statements included in the 2025 Form 10-K:

## Note 12 - Borrowings

### Assets sold under agreements to repurchase

Assets sold under agreements to repurchase amounted to \$77.5 million at June 30, 2026 and \$39 million at December 31, 2025.

The Corporation's repurchase transactions are overcollateralized with the securities detailed in the table below. In an event of default, each party has a right of set-off against the other party for amounts owed in the related agreement and any other amount or obligation owed in respect of any other agreement or transaction between them. Pursuant to the Corporation's accounting policy, the repurchase agreements are not offset with other repurchase agreements held with the same counterparty.

The following table presents information related to the Corporation's repurchase transactions accounted for as secured borrowings that are collateralized with debt securities available-for-sale, debt securities held-to-maturity, and other assets held-for-trading purposes or which have been obtained under agreements to resell. It is the Corporation's policy to maintain effective control over assets sold under agreements to repurchase; accordingly, such securities continue to be carried on the Consolidated Statements of Financial Condition.

#### **Note 15 - Guarantees**

The Corporation has obligations upon the occurrence of certain events under financial guarantees provided in certain contractual agreements. Also, from time to time, the Corporation securitized mortgage loans into guaranteed mortgage-backed securities subject in certain instances, to lifetime credit recourse on the loans that serve as collateral for the mortgage-backed securities. The Corporation has not sold any mortgage loans subject to credit recourse since 2009. Also, from time to time, the Corporation may sell, in bulk sale transactions, residential mortgage loans and Small Business Administration ("SBA") commercial loans subject to credit recourse or to certain representations and warranties from the Corporation to the purchaser. These representations and warranties may relate, for example, to borrower creditworthiness, loan documentation, collateral, prepayment and early payment defaults. The Corporation may be required to repurchase the loans under the credit recourse agreements or representation and warranties.

At June 30, 2026, the Corporation serviced \$399.7 million (December 31, 2025 - \$428.9 million) in residential mortgage loans subject to credit recourse provisions, principally loans associated with FNMA and FHLMC residential mortgage loan securitization programs. In the event of any customer default, pursuant to the credit recourse provided, the Corporation is required to repurchase the loan or reimburse the third-party investor for the loss incurred. The maximum potential amount of future payments that the Corporation would be required to make under the recourse arrangements in the event of nonperformance by the borrowers is equivalent to the total outstanding balance of the residential mortgage loans serviced with recourse and interest, if applicable. During the quarter and six months ended June 30, 2026, the Corporation repurchased \$0.1 million and \$0.4 million, respectively, of unpaid principal balance in mortgage loans subject to the credit recourse provisions (June 30, 2025 - \$0.5 million and \$0.8 million, respectively). In the event of nonperformance by the borrower, the Corporation has rights to the underlying collateral securing the mortgage loan. The Corporation suffers ultimate losses on these loans when the proceeds from a foreclosure sale of the property underlying a defaulted mortgage loan are less than the outstanding principal balance of the loan plus any uncollected interest advanced and the costs of holding and disposing the related property. At June 30, 2026, the Corporation's liability established to cover the estimated credit loss exposure related to loans sold or serviced with credit recourse amounted to \$2.0 million (December 31, 2025 - \$2.5 million).

From time to time, the Corporation sells loans and agrees to indemnify the purchaser for credit losses or any breach of certain representations and warranties made in connection with the sale.

Servicing agreements relating to the mortgage-backed securities programs of FNMA, FHLMC and GNMA, and to mortgage loans sold or serviced to certain other investors, including FHLMC, require the Corporation to advance funds to make scheduled payments of principal, interest, taxes and insurance, if such payments have not been received from the borrowers. At June 30, 2026, the Corporation serviced \$7.8 billion in mortgage loans for third-parties, including the loans serviced with credit recourse (December 31, 2025 - \$8.2 billion). The Corporation generally recovers funds advanced pursuant to these arrangements from the mortgage owner, from liquidation proceeds when the mortgage loan is foreclosed or, in the case of FHA/VA loans, under the applicable FHA and VA insurance and guarantees programs. However, in the meantime, the Corporation must absorb the cost of the funds it advances during the time the advance is outstanding. The Corporation must also bear the costs of attempting to collect on delinquent and defaulted mortgage loans. In addition, if a defaulted loan is not cured, the mortgage loan would be canceled as part of the foreclosure proceedings and the Corporation would not receive any future servicing income with respect to that loan. At June 30, 2026, the outstanding balance of funds advanced by the Corporation under such mortgage loan servicing agreements was \$23.8 million (December 31, 2025 - \$30.3 million). To the extent the mortgage loans underlying the Corporation's servicing portfolio experience increased delinquencies, the Corporation would be required to dedicate additional cash resources to comply with its obligation to advance funds as well as incur additional administrative costs related to increases in collection efforts.

Popular, Inc. Holding Company ("PIHC") fully and unconditionally guarantees certain borrowing obligations issued by certain of its 100% owned consolidated subsidiaries amounting to \$94.3 million at June 30, 2026 and December 31, 2025, respectively. In addition, at both June 30, 2026 and December 31, 2025, PIHC fully and unconditionally guaranteed on a subordinated basis \$192.7 million of capital securities (trust preferred securities) issued by wholly-owned issuing trust entities to the extent set forth in the applicable guarantee agreement. Refer to Note 17 to the Consolidated Financial Statements in the 2025 Form 10-K for further information on the trust preferred securities.

#### **Note 16 - Commitments and contingencies**

##### *Off-balance sheet risk*

The Corporation is a party to financial instruments with off-balance sheet credit risk in the normal course of business to meet the financial needs of its customers. These financial instruments include loan commitments, letters of credit and standby letters of credit. These

[Table of Content](#)

instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the Consolidated Statements of Financial Condition.

The Corporation's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit, standby letters of credit and financial guarantees is represented by the contractual notional amounts of those instruments. The Corporation uses the same credit policies in making these commitments and conditional obligations as it does for those reflected on the Consolidated Statements of Financial Condition.

Financial instruments with off-balance sheet credit risk, whose contract amounts represent potential credit risk as of the end of the periods presented were as follows:

At June 30, 2026 and December 31, 2025, the Corporation maintained a reserve of \$14.9 million and \$14.4 million, respectively, for potential losses associated with unfunded loan commitments related to commercial and construction lines of credit.

*Other commitments*

At June 30, 2026 and December 31, 2025, the Corporation also maintained other non-credit commitments for \$5.1 million and \$6.8 million, respectively, primarily for the acquisition of other investments.

*Business concentration*

Since the Corporation's business activities are concentrated primarily in Puerto Rico, its results of operations and financial condition are dependent upon the general trends of the Puerto Rico economy and, in particular, the residential and commercial real estate markets. The concentration of the Corporation's operations in Puerto Rico exposes it to greater risk than other banking companies with a wider geographic base. Its asset and revenue composition by geographical area is presented in Note 26 to the Consolidated Financial Statements.

Puerto Rico has faced significant fiscal and economic challenges for over a decade. In response to such challenges, the U.S. Congress enacted PROMESA in 2016, which, among other things, established the Oversight Board and a framework for the restructuring of the debts of the Commonwealth, its instrumentalities and municipalities. The Commonwealth and several of its instrumentalities have availed themselves of debt restructuring proceedings under PROMESA. As of the date of this report, while municipalities have been designated as covered entities under PROMESA, no municipality has commenced or has been authorized by the Oversight Board to commence, any such debt restructuring proceeding under PROMESA.

At June 30, 2026, the Corporation's direct exposure to the Puerto Rico government and its instrumentalities and municipalities totaled \$464.1 million, of which \$414.7 million were outstanding (\$391.3 million and \$342.9 million at December 31, 2025). The Corporation's exposure at June 30, 2026 included up to \$47.4 million in Automated Clearing House ("ACH") transaction settlement exposure, none of which was outstanding. Of the amount outstanding, \$407.6 million consists of loans and \$7.1 million are securities (\$333.2 million and \$8.8 million at December 31, 2025). Substantially all of the amount outstanding at June 30, 2026 and December 31, 2025 were obligations from various Puerto Rico municipalities. In most cases, these were "general obligations" of a municipality, to which the applicable municipality has pledged its good faith, credit and unlimited taxing power, or "special obligations" of a municipality, to which the applicable municipality has pledged other revenues. At June 30, 2026, approximately 81% of the Corporation's exposure to municipal loans and securities was concentrated in the municipalities of San Juan, Guaynabo, Carolina and Caguas.

The following table details the loans and investments representing the Corporation's direct exposure to the Puerto Rico government according to their maturities as of June 30, 2026:

In addition, at June 30, 2026, the Corporation had \$199.7 million in loans insured or securities issued by Puerto Rico governmental entities but for which the principal source of repayment is non-governmental ( \$209.3 million at December 31, 2025). These included \$164.9 million in residential mortgage loans insured by the Puerto Rico Housing Finance Authority ("HFA"), a governmental instrumentality that has been designated as a covered entity under PROMESA ( December 31, 2025 - \$166.9 million ). These mortgage loans are secured by first mortgages on Puerto Rico residential properties and the HFA insurance covers losses in the event of a borrower default and upon the satisfaction of certain other conditions. The Corporation also had at June 30, 2026, \$34.8 million in bonds issued by HFA which are secured by second mortgage loans on Puerto Rico residential properties, and for which HFA also provides insurance to cover losses in the event of a borrower default and upon the satisfaction of certain other conditions ( December 31, 2025 - \$35.5 million). In the event that the mortgage loans insured by HFA and held by the Corporation directly or those serving as collateral for the HFA bonds default and the collateral is insufficient to satisfy the outstanding balance of these loans, HFA's ability to honor its insurance will depend, among other factors, on the financial condition of HFA at the time such obligations become due and payable. The Corporation does not consider the government guarantee when estimating the credit losses associated with this portfolio. Although the Governor is currently authorized by local legislation to impose a temporary moratorium on the financial obligations of the HFA, a moratorium on such obligations has not been imposed as of the date hereof.

BPPR's commercial loan portfolio also includes loans to private borrowers who are service providers, lessors, suppliers or have other relationships with the government. These borrowers could be negatively affected by the Commonwealth's fiscal crisis and the ongoing Title III proceedings under PROMESA. Similarly, BPPR's mortgage and consumer loan portfolios include loans to government employees and retirees, which could also be negatively affected by fiscal measures such as employee layoffs or furloughs or reductions in pension benefits.

In addition, \$2.7 billion of residential mortgages and \$84.3 million commercial loans were insured or guaranteed by the U.S. Government or its agencies at June 30, 2026 (compared to \$2.5 billion and \$80.5 million, respectively, at December 31, 2025). The Corporation also had U.S. Treasury and obligations from the U.S. Government, its agencies or government sponsored entities within the portfolio of available-for-sale and held-to-maturity securities as described in Note 5 and 6 to the Consolidated Financial Statements.

At June 30, 2026, the Corporation had operations in the United States Virgin Islands (the "USVI") and had \$28.3 million in direct exposure to USVI government entities ( December 31, 2025 - \$28.3 million ). The USVI has been experiencing a number of fiscal and economic challenges that could adversely affect the ability of its public corporations and instrumentalities to service their outstanding debt obligations.

At June 30, 2026, the Corporation had operations in the British Virgin Islands ("BVI") and it had a loan portfolio amounting to \$197.6 million comprised of various retail and commercial clients, compared to a loan portfolio of \$195.3 million at December 31, 2025. At June 30, 2026, the Corporation had no significant exposure to a single borrower in the BVI.

#### Legal Proceedings

The nature of Popular's business ordinarily generates claims, litigation, arbitration, regulatory and governmental investigations, and legal and administrative cases and proceedings (collectively, "Legal Proceedings"). Popular's Legal Proceedings may involve various lines of business and include claims relating to contract, torts, consumer protection, securities, antitrust, employment, tax and other laws. The recovery sought in Legal Proceedings may include substantial or indeterminate compensatory damages, punitive damages, injunctive relief, or recovery on a class-wide basis. When the Corporation determines that it has meritorious defenses to the claims asserted, it vigorously defends itself. The Corporation will consider the settlement of cases (including cases where it has meritorious defenses) when, in management's judgment, it is in the best interest of the Corporation and its stockholders to do so. On at least a quarterly basis, Popular assesses its liabilities and contingencies relating to outstanding Legal Proceedings utilizing the most current information available. For matters where it is probable that the Corporation will incur a material loss and the amount can be reasonably estimated, the Corporation establishes an accrual for the loss. Once established, the accrual is adjusted on at least a quarterly basis to reflect any relevant

developments, as appropriate. For matters where a material loss is not probable, or the amount of the loss cannot be reasonably estimated, no accrual is established.

In certain cases, exposure to loss exists in excess of any accrual to the extent such loss is reasonably possible, but not probable. Management believes and estimates that the range of reasonably possible losses (with respect to those matters where such limits may be determined in excess of amounts accrued) for current Legal Proceedings ranged from \$0 to approximately \$11.3 million as of June 30, 2026. In certain cases, management cannot reasonably estimate the possible loss at this time. Any estimate involves significant judgment, given the varying stages of the Legal Proceedings (including the fact that many of them are currently in preliminary stages), the existence of multiple defendants in several of the current Legal Proceedings whose share of liability has yet to be determined, the numerous unresolved issues in many of the Legal Proceedings, and the inherent uncertainty of the various potential outcomes of such Legal Proceedings. Accordingly, management's estimate will change from time-to-time, and actual losses may be more or less than the current estimate.

While the outcome of Legal Proceedings is inherently uncertain, based on information currently available, advice of counsel, and available insurance coverage, management believes that the amount it has already accrued is adequate and any incremental liability arising from the Legal Proceedings in matters in which a loss amount can be reasonably estimated will not have a material adverse effect on the Corporation's consolidated financial position. However, in the event of unexpected future developments, it is possible that the ultimate resolution of these matters in a reporting period, if unfavorable, could have a material adverse effect on the Corporation's consolidated financial position for that period.

#### **Note 17 - Non-consolidated variable interest entities**

The Corporation is involved with two statutory trusts which it created to issue trust preferred securities to the public. These trusts are deemed to be variable interest entities ("VIEs") since the equity investors at risk have no substantial decision-making rights. The Corporation does not hold any variable interest in the trusts, and therefore, cannot be the trusts' primary beneficiary. Furthermore, the Corporation concluded that it did not hold a controlling financial interest in these trusts since the decisions of the trusts are predetermined through the trust documents and the guarantee of the trust preferred securities is irrelevant since in substance the sponsor is guaranteeing its own debt.

Also, the Corporation is involved with various special purpose entities mainly in guaranteed mortgage securitization transactions, including GNMA and FNMA. The Corporation has also engaged in securitization transactions with FHLMC, but considers its exposure in the form of servicing fees and servicing advances not to be significant at June 30, 2026. These special purpose entities are deemed to be VIEs since they lack equity investments at risk. The Corporation's continuing involvement in these guaranteed loan securitizations includes owning certain beneficial interests in the form of securities as well as the servicing rights retained. The Corporation is not required to provide additional financial support to any of the variable interest entities to which it has transferred the financial assets. The mortgage-backed securities, to the extent retained, are classified in the Consolidated Statements of Financial Condition as available-for-sale or trading securities. The Corporation concluded that, essentially, these entities (FNMA and GNMA) control the design of their respective VIEs, dictate the quality and nature of the collateral, require the underlying insurance, set the servicing standards via the servicing guides and can change them at will, and can remove a primary servicer with cause, and without cause in the case of FNMA. Moreover, through their guarantee obligations, agencies (FNMA and GNMA) have the obligation to absorb losses that could be potentially significant to the VIE.

The Corporation holds variable interests in these VIEs in the form of agency mortgage-backed securities and collateralized mortgage obligations, including those securities originated by the Corporation and those acquired from third parties. Additionally, the Corporation holds agency mortgage-backed securities and agency collateralized mortgage obligations issued by third party VIEs in which it has no other form of continuing involvement. Refer to Note 16 to the Consolidated Financial Statements for additional information on the debt securities outstanding at June 30, 2026 and December 31, 2025, which are classified as available-for-sale and trading securities in the Consolidated Statements of Financial Condition. In addition, the Corporation holds variable interests in the form of servicing fees, since it retains the right to service the transferred loans in those government-sponsored special purpose entities ("SPEs") and may also purchase the right to service loans in other government-sponsored SPEs that were transferred to those SPEs by a third-party.

The following table presents the carrying amount and classification of the assets related to the Corporation's variable interests in non-consolidated VIEs and the maximum exposure to loss as a result of the Corporation's involvement as servicer of GNMA and FNMA loans at June 30, 2026 and December 31, 2025.

| Maximum exposure to loss  | \$ 76,124     | \$ 77,621         |

The size of the non-consolidated VIEs, in which the Corporation has a variable interest in the form of servicing fees, measured as the total unpaid principal balance of the loans, amounted to \$5.7 billion at June 30, 2026 (December 31, 2025 - \$6.0 billion).

The Corporation determined that the maximum exposure to loss includes the fair value of the MSRs and the assumption that the servicing advances at June 30, 2026 and December 31, 2025, will not be recovered. The agency debt securities are not included as part of the maximum exposure to loss since they are guaranteed by the related agencies.

ASU 2009-17 requires that an ongoing primary beneficiary assessment should be made to determine whether the Corporation is the primary beneficiary of any of the VIEs it is involved with. The conclusion on the assessment of these non-consolidated VIEs has not changed since their initial evaluation. The Corporation concluded that it is still not the primary beneficiary of these VIEs, and therefore, these VIEs are not required to be consolidated in the Corporation's financial statements at June 30, 2026.

#### Note 19 - Fair value measurement

ASC Subtopic 820-10 "Fair Value Measurements and Disclosures" establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three levels in order to increase consistency and comparability in fair value measurements and disclosures. The hierarchy is broken down into three levels based on the reliability of inputs as follows:

- *Level 1* - Unadjusted quoted prices in active markets for identical assets or liabilities that the Corporation has the ability to access at the measurement date. Valuation on these instruments does not necessitate a significant degree of judgment since valuations are based on quoted prices that are readily available in an active market.
- *Level 2* - Quoted prices other than those included in Level 1 that are observable either directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or that can be corroborated by observable market data for substantially the full term of the financial instrument.
- *Level 3* - Inputs are unobservable and significant to the fair value measurement. Unobservable inputs reflect the Corporation's own judgments about assumptions that market participants would use in pricing the asset or liability.

The Corporation maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the observable inputs be used when available. Fair value is based upon quoted market prices when available. If listed prices or quotes are not available, the Corporation employs internally-developed models that primarily use market-based inputs including yield curves, interest rates,

[Table of Content](#)

volatilities, and credit curves, among others. Valuation adjustments are limited to those necessary to ensure that the financial instrument's fair value is adequately representative of the price that would be received or paid in the marketplace. These adjustments include amounts that reflect counterparty credit quality, the Corporation's credit standing, constraints on liquidity and unobservable parameters that are applied consistently. There have been no changes in the Corporation's methodologies used to estimate the fair value of assets and liabilities from those disclosed in the 2025 Form 10-K.

The estimated fair value may be subjective in nature and may involve uncertainties and matters of significant judgment for certain financial instruments. Changes in the underlying assumptions used in calculating fair value could significantly affect the results.

*Fair Value on a Recurring and Nonrecurring Basis*

#### Note 20 - Fair value of financial instruments

The fair value of financial instruments is the amount at which an asset or obligation could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. For those financial instruments with no quoted market prices available, fair values have been estimated using present value calculations or other valuation techniques, as well as management's best judgment with respect to current economic conditions, including discount rates, estimates of future cash flows, and prepayment assumptions. Many of these estimates involve various assumptions and may vary significantly from amounts that could be realized in actual transactions.

The fair values reflected herein have been determined based on the prevailing rate environment at June 30, 2026 and December 31, 2025, as applicable. In different interest rate environments, fair value estimates can differ significantly, especially for certain fixed rate financial instruments. In addition, the fair values presented do not attempt to estimate the value of the Corporation's fee generating businesses and anticipated future business activities, that is, they do not represent the Corporation's value as a going concern. There have been no changes in the Corporation's valuation methodologies and inputs used to estimate the fair values for each class of financial assets and liabilities not measured at fair value.

The following tables present the carrying amount and estimated fair values of financial instruments with their corresponding level in the fair value hierarchy. The aggregate fair value amounts of the financial instruments disclosed do not represent management's estimate of the underlying value of the Corporation.

Revenue from contracts with customers is recognized when, or as, the performance obligations are satisfied by the Corporation by transferring the promised services to the customers based on ASC Topic 606 Revenue from Contracts with Customers. Revenue streams identified from contracts with customers, as listed above, will have certain timing for recognition based on the nature of the contract including when the obligation is satisfied and/or services are rendered. Service charges on deposit accounts, debit card fees, and credit card fees are recognized at a point in time, upon the occurrence of an activity or an event. Interchange fees on debit and credit card transactions are recognized upon settlement of the payment transaction. For more details over nature and timing of revenue streams from

contracts with customers refer to Note 31 on the 2025 Form 10-K for a complete description of the nature and timing of revenue streams from contracts with customers.

## Note 23 - Stock-based compensation

### Incentive Plan

On May 12, 2020, the stockholders of the Corporation approved the Popular, Inc. 2020 Omnibus Incentive Plan, which permits the Corporation to issue several types of stock-based compensation to employees and directors of the Corporation and/or any of its subsidiaries (the "2020 Incentive Plan"). The 2020 Incentive Plan replaced the Popular, Inc. 2004 Omnibus Incentive Plan, which was in effect prior to the adoption of the 2020 Incentive Plan (the "2004 Incentive Plan" and, together with the 2020 Incentive Plan, the "Incentive Plan"). Participants under the Incentive Plan are designated by the Talent and Compensation Committee of the Board of Directors (or its delegate, as determined by the Board). Under the Incentive Plan, the Corporation has issued restricted stock and performance shares to its employees and restricted stock and restricted stock units ("RSUs") to its directors.

The restricted stock granted under the Incentive Plan to employees becomes vested based on the employees' continued service with Popular. Unless otherwise stated in an agreement, the compensation cost associated with the shares of restricted stock granted prior to 2021 was determined based on a two-prong vesting schedule. These grants include ratable vesting over five or four years commencing at the date of grant (the "graduated vesting portion") with a portion vested at termination of employment after attainment of 55 years of age and 10 years of service or 60 years of age and 5 years of service (the "retirement vesting portion"). The graduated vesting portion is accelerated at termination of employment after attaining the earlier of 55 years of age and 10 years of service or 60 years of age and 5 years of service. Restricted stock granted on or after 2021 have ratable vesting in equal annual installments over a period of 4 years or 3 years, depending on the classification of the employee. The vesting schedule is accelerated at termination of employment after attaining the earlier of 55 years of age and 10 years of service or 60 years of age and 5 years of service.

The performance share awards granted under the Incentive Plan consist of the opportunity to receive shares of Popular, Inc.'s common stock provided that the Corporation achieves certain goals during a three-year performance cycle. The goals are based on two metrics weighted equally: the Relative Total Shareholder Return ("TSR") and the Absolute Return on Average Tangible Common Equity ("ROTCE"). The TSR metric is a market condition under ASC Topic 718. For equity settled awards based on market conditions, the fair value is determined as of the grant date and is not subsequently revised based on actual performance. The ROTCE metric is a performance condition under ASC Topic 718. For equity settled awards based on a performance condition, the fair value is determined based on the probability of achieving the ROTCE goal as of each reporting period. The TSR and ROTCE metrics are equally weighted and work independently. The number of shares that will ultimately vest ranges from 50% to a 150% target based on both market (TSR) and performance (ROTCE) conditions. The performance shares vest at the end of the three-year performance cycle. If a participant terminates employment after attaining the earlier of 55 years of age and 10 years of service or 60 years of age and 5 years of service, the performance shares shall continue outstanding and vest at the end of the performance cycle.

The following table summarizes the restricted stock and performance shares activity under the Incentive Plan for members of management.

#### Note 24 - Income taxes

For the quarter ended June 30, 2026, the Corporation recorded income tax expense of \$45.7 million, a decrease of \$2.2 million from \$47.9 million in the comparable 2025 period. The effective tax rate ("ETR") decreased to 14.1% from 18.5%. For the six-month period ended June 30, 2026, income tax expense was \$92.7 million, consistent with the \$92.9 million reported for the same period in 2025. The ETR decreased to 15.0% from 19.3% for the first six months of 2025. The lower ETR for both the quarter and six month periods were driven by higher exempt income and other tax benefits, including the vesting of stock awards, the purchase of tax credits, and income subject to preferential income tax rates. The Puerto Rico statutory tax rate is 37.5% for both periods.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and their tax bases. Significant components of the Corporation's deferred tax assets and liabilities at June 30, 2026, and December 31, 2025, were as follows:

The net deferred tax assets shown in the table above at June 30, 2026, is reflected in the Consolidated Statements of Financial Condition as \$794.7 million in net deferred tax assets in the "Other assets" caption (December 31, 2025 - \$814.2 million) and \$649 thousand in deferred tax liabilities in the "Other liabilities" caption (December 31, 2025 - \$1.9 million), reflecting the aggregate deferred tax assets or liabilities of individual tax-paying subsidiaries of the Corporation in their respective tax jurisdiction, Puerto Rico or the United States.

At June 30, 2026, the net deferred tax assets of the U.S. operations, before valuation allowance, amounted to \$605.8 million. After considering the valuation allowance of \$386.6 million, the total net deferred tax assets amounted to \$219.2 million. The U.S. Operations have generated taxable income each of the last three years. The financial results for the six-months period of 2026 continue to show an upward trend similar to 2024 and 2025. These financial results are objectively verifiable positive evidence. Additionally, the Corporation considered as negative evidence inconsistency in performance trends, including lower than anticipated results in recent periods. Also, management considered the uncertainty in predicting future taxable income, given the impact of external factors such as changes in

macroeconomic conditions, geopolitical issues, and shifts in monetary policy. In addition, management evaluated the expiration period of the NOLs carried forward which begin to expire in 2028. Since the Corporation evaluates the realization of the deferred tax assets by taxing jurisdiction on a quarterly basis, as additional information becomes available and performance indicators evolve, the weight assigned to factors considered in the assessment could change.

At June 30, 2026, after weighting all positive and negative evidence, the Corporation concluded that it is more likely than not that \$219.2 million of the deferred tax assets from the U.S. operations, comprised mainly of net operating losses, will be realized. The Corporation based this determination on its estimated taxable income available to realize the deferred tax assets for the remaining carryforward periods, together with the historical level of book income adjusted by permanent differences and taxable income. Management will continue to monitor and review the U.S. operation's results, including recent earnings trends, pre-tax earnings forecasts, new tax initiatives, and performance indicators, such as net income versus forecast, targeted loan growth, net interest income margin, changes in deposit costs, allowance for credit losses, charge-offs, NPLs inflows, and NPA balances. Significant changes, or a combination of changes, could positively or negatively impact the amount of deferred tax assets to be realized in the future.

At June 30, 2026, the Corporation's net deferred tax assets related to its Puerto Rico operations amounted to \$658.9 million. The Corporation's Puerto Rico Banking operation has a historical record of profitability. This is considered as strong objectively verifiable positive evidence that outweighs any negative evidence considered by management in the evaluation of the realization of the deferred tax assets. Based on this evidence and management's estimate of future taxable income, the Corporation has concluded that it is more likely than not that such net deferred tax assets of the Puerto Rico Banking operations will be realized.

The Holding Company operation has been in a cumulative loss position. Management expects these losses will be a trend in future years. This objectively verifiable negative evidence is considered by Management strong negative evidence that suggests that income in future years will be insufficient to support the realization of all deferred tax assets. After weighting of all positive and negative evidence Management concluded, as of the reporting date, that it is more likely than not that the Holding Company will not be able to realize any portion of the deferred tax assets. Accordingly, the Corporation has maintained a valuation allowance on the deferred tax assets of \$84.0 million as of June 30, 2026.

The Corporation and its subsidiaries file income tax returns in Puerto Rico, the U.S. federal jurisdiction, various U.S. states and political subdivisions, and foreign jurisdictions. At June 30, 2026, the following years remain subject to examination in the U.S. Federal jurisdiction, 2022 and thereafter; and in the Puerto Rico jurisdiction, 2019 and thereafter.

**OVERVIEW*****Financial highlights for the quarter ended June 30, 2026***

The Corporation's net income for the quarter ended June 30, 2026 amounted to \$278.2 million, an increase of \$67.8 million when compared to net income of \$210.4 million for the quarter ended June 30, 2025. Higher net income was mainly driven by higher net interest income, higher non-interest income, and lower operating expenses partially offset by an increase in the provision for credit losses.

Financial highlights for the quarter ended June 30, 2026 include:

- Net interest income amounted to \$693.4 million, an increase of \$61.9 million when compared to the quarter ended June 30, 2025 driven by higher investments in U.S. Treasury securities at higher yields, loan growth and lower cost of deposits, mainly P.R. public deposits, partially offset by lower money market investments. Net interest income on a taxable equivalent basis for the second quarter of 2026 was \$788.8 million, an increase of \$91.6 million when compared to the same quarter for 2025. Net interest margin expanded by 17 basis points to 3.66% when compared to the same period in 2025. On a taxable equivalent basis, net interest margin expanded by 32 basis points to 4.17% when compared to the same period in 2025.
- The provision for credit losses amounted to \$65.5 million for the quarter ended June 30, 2026, an increase of \$17.1 million when compared to the quarter ended June 30, 2025, driven by higher specific reserves in the BPPR commercial loan portfolio associated with the unreserved portion of a \$155 million nonperforming loan held-in-portfolio ("NPL") transferred to loans held-for-sale ("LHFS") with a resulting \$71 million charge-off and specific reserves related to two commercial and industrial relationships totaling \$129 million that were classified as NPLs during the quarter, partially offset by lower provisions for certain consumer loan portfolios attributable to improved credit metrics, improved macroeconomic assumptions, net recoveries in the mortgage portfolio and lower volumes in the auto loan portfolio. Provision for credit losses decreased at PB primarily due to the higher qualitative reserves established during the second quarter of 2025, compared to 2026, to maintain adequate ACL coverage as well as an overall improvement in credit quality.
- Non-interest income amounted to \$180.5 million, an increase of \$12.1 million when compared to the quarter ended June 30, 2025, mainly driven by higher credit and debit card fee income driven by higher activity and purchase volumes including those of commercial credit cards that benefited from the recent launch of new corporate-focused products.
- Operating expenses amounted to \$484.1 million for the quarter, reflecting a decrease of \$8.6 million when compared to the quarter ended June 30, 2025. The decrease was mainly driven by lower operational loss reserves and lower professional services expense, partially offset by higher technology and software expenses as a result of our continued investment in technology and higher business promotion expenses.
- Income tax expense of \$45.7 million with an effective tax rate ("ETR") of 14.1% during the quarter ended June 30, 2026, compared to an income tax expense of \$47.9 million with an ETR of 18.5% for the quarter ended June 30, 2025 due to higher exempt income and other tax benefits, including the vesting of stock awards, the purchase of tax credits, and income subject to preferential tax rates.
- At June 30, 2026, the Corporation's total assets amounted to \$79.0 billion, compared to \$75.3 billion at December 31, 2025. The increase of \$3.7 billion was primarily due to an increase in the available-for-sale ("AFS") securities portfolio, driven by reinvestment in U.S. Treasury securities, and higher loans held-in-portfolio partially offset by a decrease in held-to-maturity ("HTM") investment securities driven by maturities and principal paydowns.
- Deposits amounted to \$70.2 billion at June 30, 2026, an increase of \$4.0 billion from December 31, 2025, primarily driven by growth at BPPR, mainly in P.R. public deposits and commercial deposits.
- Stockholders' equity amounted to \$6.4 billion at June 30, 2026, compared to \$6.2 billion at December 31, 2025. The Corporation and its banking subsidiaries continue to be well capitalized. As of June 30, 2026, the Corporation's tangible book value per common share was \$87.94, an increase of \$5.29 from December 31, 2025. The Common Equity Tier 1 Capital Ratio at June 30, 2026 was 16.08%, compared to 15.72% at December 31, 2025.

**Non-GAAP Financial Measures**

This Form 10-Q contains financial information prepared under accounting principles generally accepted in the United States ("U.S. GAAP") and non-GAAP financial measures. Management uses non-GAAP financial measures when it is determined that these measures provide meaningful information about the underlying performance of the Corporation's ongoing operations. Non-GAAP financial measures used by the Corporation may not be comparable to similarly named non-GAAP financial measures used by other companies.

**Adjusted net income - Non-GAAP Financial Measure**

In addition to analyzing the Corporation's results on a reported basis, management monitors whether the impact of certain non-recurring or infrequent transactions need to be excluded from the results of operations to present what is then considered to be "adjusted net income" of the Corporation. Management believes that the "adjusted net income" provides meaningful information about the underlying performance of the Corporation's ongoing operations. The "adjusted net income" is a non-GAAP financial measure.

There were no non-GAAP adjustments for the quarter and six months ended June 30, 2026.

**Net interest income on a taxable equivalent basis - Non-GAAP Financial Measure**

Net interest income, on a taxable equivalent basis, is presented with its different components in Tables 2 and 3 for the quarter and six months ended June 30, 2026, as compared with the same period in 2025, segregated by major categories of interest earning assets and interest-bearing liabilities.

The main sources of tax-exempt interest income are certain loans and investments in obligations of the U.S. Government, its agencies and sponsored entities, and certain obligations of the Commonwealth of Puerto Rico and its agencies and assets held by the Corporation's international banking entities. On Tables 2 and 3, the interest income has been converted to a taxable equivalent basis, using the applicable statutory income tax rates for each period net of interest expense that the Puerto Rico tax law requires to be disallowed, based on an equal proportion of tax-exempt assets to total assets, and by an allocation of general and administrative expenses attributed to exempt income, reducing the benefit of the tax-exempt income. The effective yield, on a taxable equivalent basis, will vary depending on the level of these expenses that are attributed to the available exempt income. Under Puerto Rico tax law, the exempt interest can be deducted up to the amount of taxable income. Management believes that this presentation provides meaningful information since it facilitates the comparison of revenues arising from taxable and exempt sources.

**Tangible Common Equity and Tangible Assets**

Tangible common equity, tangible common equity ratio, tangible assets and tangible book value per common share are non-GAAP financial measures. Tangible common equity ratio and tangible book value per common share should be used in conjunction with more traditional bank capital ratios commonly used by banks and analysts to compare the capital adequacy of banking organizations with significant amounts of goodwill or other intangible assets, typically stemming from the use of the purchase accounting method for mergers and acquisitions. Return on average tangible common equity is also a measure commonly used by banks and analysts to measure the return on that tangible common equity. The Corporation presents return on average tangible common equity with and without the impact of unrealized (gains) losses on AFS securities including those transferred to HTM in the denominator because we believe that adding back the impact of unrealized (gains) losses on AFS securities including those transferred to HTM to the denominator provides meaningful information about the Corporation's return on capital. Unless otherwise indicated, references to "ROTCE" in this Form 10-Q means return on average tangible common equity as adjusted to add back unrealized (gains) losses on AFS securities, including those transferred to HTM. Tangible common equity, tangible assets and other related measures should not be used in isolation or as a substitute for stockholders' equity, total assets or any other measure calculated in accordance with GAAP. Moreover, the way the Corporation calculates its tangible common equity, tangible assets and other related measures may differ from that of other companies reporting measures with similar names.

Table 9 provides a reconciliation of total stockholders' equity to tangible common equity and total assets to tangible assets as of June 30, 2026 and December 31, 2025.

**CRITICAL ACCOUNTING POLICIES / ESTIMATES**

The accounting and reporting policies followed by the Corporation and its subsidiaries conform to U.S. GAAP and general practices within the financial services industry. Various elements of the Corporation's accounting policies, by their nature, are inherently subject to estimation techniques, valuation assumptions and other subjective assessments.

Management has discussed the development and selection of the critical accounting estimates with the Corporation's Audit Committee. The Corporation has identified as critical accounting estimates those related to: (i) Fair Value Measurement of Financial Instruments; (ii) Loans and Allowance for Credit Losses; (iii) Income Taxes; (iv) Goodwill and Other Intangible Assets; and (v) Pension and Postretirement Benefit Obligations. For a summary of these critical accounting estimates, refer to the MD&A included in the 2025 Form 10-K. Also, refer to Note 2 to the Consolidated Financial Statements included in the 2025 Form 10-K for a summary of the Corporation's significant accounting policies including those considered critical accounting estimates and to **Note 3** to the Consolidated Financial Statements included in this Form 10-Q for information on recently adopted accounting standard updates.

## STATEMENT OF OPERATIONS ANALYSIS

### NET INTEREST INCOME

Net interest income ("NII") for the quarter ended June 30, 2026 was \$693.4 million, an increase of \$61.9 million, when compared to the same quarter in 2025. NII growth was attributable to higher income from investments in U.S. Treasury Securities, loan growth and lower cost of deposits by \$23.8 million, primarily due to P.R. public deposits. Net interest income on a taxable equivalent basis for the second quarter of 2026 was \$788.8 million, an increase of \$91.6 million when compared to the same period in 2025.

Net interest margin ("NIM") for the quarter was 3.66%, an increase of 17 basis points when compared to the second quarter of 2025. On a taxable equivalent basis, NIM for the second quarter of 2026 was 4.17%, higher by 32 basis points compared to the second quarter of 2025, mainly due to higher level of tax-exempt securities and loans. NIM expansion, when compared to the same quarter of the previous year, was primarily due to higher yields on U.S. Treasury securities and lower deposit costs resulting from the repricing of market-linked high-cost deposits, mainly P.R. public deposits. Total cost of deposits decreased 21 basis points to 1.57% compared to the second quarter of 2025. Excluding P.R. public deposits, total deposit costs decreased five basis points to 1.10% compared to the same quarter in 2025.

On a taxable equivalent basis, the main drivers of the increase for the second quarter of 2026 compared to the second quarter of 2025 were:

- higher income from loans by \$40.2 million, mostly due to higher average loan portfolio balances by \$2.0 billion across most portfolios, along with higher yields from auto, leases and mortgage portfolios. When compared to the second quarter of 2025, loan yields increased three basis points to 7.53%;
- higher income from U.S. Treasury securities of \$52.9 million, or 43 basis points, attributable to higher average balances from purchases and reinvestments in higher-yielding U.S. Treasury securities, including \$2.5 billion of U.S. Treasury Notes ("U.S. T-Notes") purchased in the third quarter of 2025 and \$1.1 billion U.S. T-Notes purchased in the second quarter of 2026; and
- lower interest expense on deposits by \$23.8 million or 28 basis points. The cost of interest-bearing deposits decreased by 28 basis points, driven by repricing of market-linked P.R. public deposits which decreased by 61 basis points to 2.61%, coupled with a decrease in Popular U.S. deposit costs attributable to repricing across most deposit products;

partially offset by:

- lower income from money market investments by \$22.5 million or 76 basis points, as a result of lower average balances, driven by higher re-investment activity in U.S. Treasury securities and loan growth, coupled with lower yields resulting from declining short-term market rates during late 2025.

NII for the six months ended June 30, 2026 was \$1.4 billion, an increase of \$126.5 million when compared to the same period in 2025. The NII increase was attributable to higher income from U.S. Treasury securities and loan growth, and lower cost on deposits by \$62.2 million, mainly due to lower cost of P.R. public deposits by 64 basis points compared to the same period in 2025. NII on a taxable equivalent basis ("FTE") of \$1.5 billion, increased \$185.5 million when compared with the same period of 2025.

NIM increased 22 basis points to 3.67%. NIM FTE was 4.16%, an increase of 36 basis points when compared to the same period in 2025. NIM expansion was mainly driven by money market and investments securities yields which increased by 17 basis points, purchases and re-investments of maturities into higher yielding U.S. Treasury securities, and lower deposit costs resulting mainly from the repricing of P.R.

public market-linked high-cost deposits. Total cost of deposits decreased 24 basis points to 1.57% compared to the same period in 2025. Excluding P.R. public deposits, total deposit costs decreased seven basis points to 1.09% compared to the same period in 2025.

On a taxable equivalent basis, the main drivers for the six months ended on June 30, 2026 compared to the six months ended June 30, 2025:

- higher income from loans by \$87.2 million, or four basis points, driven by loan growth particularly across most portfolios, along with higher loan yields driven by the auto, leases and mortgage portfolios;
- higher income from U.S. Treasury securities by \$95.3 million, or 44 basis points, primarily reflecting higher average balances due to purchases of and reinvestments in higher-yielding U.S. Treasury securities including \$2.5 billion of U.S. T-Notes purchased in the third quarter of 2025 and \$1.1 billion U.S. T-Notes purchased in the second quarter of 2026; and
- lower interest expense on deposits by \$62.2 million or 24 basis points. The cost of interest-bearing deposits declined by 32 basis points, driven by a 64 basis point decrease in market-linked P.R. public deposits to 2.63%, coupled with lower deposit costs in Popular U.S. attributable to repricing of online savings and time deposits;

partially offset by:

- lower income from money market investments by \$48.4 million or 76 basis points, reflecting lower average balances and lower yields attributable to the decline in short-term market rates during late 2025.

**Provision for Credit Losses - Loans Held-in-Portfolio and Unfunded Commitments**

For the quarter ended June 30, 2026, the Corporation recorded a provision for credit losses related to loans held-in-portfolio and unfunded commitments of \$65.5 million, an increase of \$17.1 million when compared to the same quarter of the previous year. The provision for loan and lease losses was \$65.2 million, an increase of \$15.6 million compared to the same quarter of the previous year, and the provision for unfunded commitments was \$0.4 million, an unfavorable variance of \$1.5 million, mainly driven by a release of the unfunded commitments reserve in BPPR during the second quarter of 2025.

As discussed in **Note 8** to the Consolidated Financial Statements, the Corporation estimates the ACL by weighting the outputs of optimistic, baseline, and pessimistic scenarios. Among the three scenarios evaluated to estimate the ACL, the baseline scenario was assigned the highest probability, followed by the pessimistic scenario, and then the optimistic scenario with the lowest probability. There were no changes to the probability weights assigned during the second quarter of 2026 when compared to June 30, 2025.

The major drivers of the changes in the provision for loan losses during the quarter by business segment when compared to the same quarter in 2025, were as follows:

- In the BPPR segment, the provision for loan losses was \$61.7 million, an increase of \$18.6 million. The increase was primarily attributable to a \$51.4 million increase in provision expense for the commercial loan portfolio, reflecting higher specific reserves, including a portion of the \$71.3 million charge-off related to a \$155.0 million non-performing loan transferred to held-for-sale that had not been previously reserved, as well as specific reserves for two commercial and industrial loans totaling \$129.0 million that were placed on non-performing status during the second quarter of 2026. This increase was partially offset by a \$32.7 million decrease in provision expense for the consumer and mortgage loan segments driven by improved credit metrics in the consumer portfolios and improved macroeconomic assumptions and higher net recoveries in the mortgage loan segment.
- In the Popular U.S. segment, the provision for loan losses was \$3.4 million for the quarter ended June 30, 2026, a decrease of \$3.0 million, mainly driven by lower provisions in both the commercial and mortgage segments, with reductions of \$1.6 million and \$1.3 million, respectively. The favorable variance was due to higher qualitative reserves for commercial loans established in the second quarter of 2025, in addition to an overall improvement in credit quality.

For the six months ended June 30, 2026, the provision for credit losses related to loans held-in-portfolio and unfunded commitments amounted to \$141.3 million, an increase of \$29.0 million, compared to the six months ended June 30, 2025. The provision for loan losses was \$140.8 million, an increase of \$26.1 million, and the provision related to reserves for unfunded commitments was \$0.5 million, an unfavorable variance of \$2.9 million, mainly driven by a release of the unfunded commitments reserves by \$2.4 million in the six-month period ended June 30, 2025. The major drivers of the change in the provision for loan losses during the six months ended June 30, 2026 by business segment when compared to the same period in 2025, were as follows:

- In the BPPR segment, the provision for loan losses was \$136.2 million, an increase of \$39.2 million, driven by higher provision expense in the commercial loan segment associated with the \$71.3 million charge-off mentioned above, partially offset by lower provision in the mortgage loan portfolio due to higher recoveries recognized, consumer loans with lower reserves, and changes in macroeconomic forecasts.
- In the Popular U.S. segment, the provision for loan losses was \$5.8 million, a decrease of \$13.1 million, driven by lower provision expense in both the commercial and consumer loan segments, due to higher qualitative reserves established in 2025 to address ACL coverage and improvements in overall credit quality.

At June 30, 2026, the total allowance for credit losses for loans held-in-portfolio amounted to \$784.8 million, a decrease of \$23.2 million when compared to December 31, 2025. The ratio of the allowance for credit losses to loans held-in-portfolio was 1.97% at June 30, 2026 compared to 2.05% at December 31, 2025. Refer to **Note 8** to the Consolidated Financial Statements for additional information on the Corporation's methodology to estimate its ACL. Refer to the Credit Risk section of this MD&A for a detailed analysis of net charge-offs, non-performing assets, the allowance for credit losses and selected loan losses statistics.

**Non-Interest Income**

Non-interest income for the second quarter of 2026 of \$180.5 million, an increase of \$12.1 million when compared with the same quarter for the previous year. The variance was primarily due to:

- higher other service fees by \$8.3 million, primarily driven by a \$5.9 million increase in debit and credit card fees, reflecting growth in transaction activity and higher purchase volumes, coupled with a \$1.1 million increase in asset management fees driven by higher assets under management; and
- higher other operating income by \$2.4 million, mainly due to a \$6.1 million increase in earnings from an investment accounted for under the equity method that benefited from an unrealized gain of \$3.1 million in the valuation of an investment, partially offset by two items recognized in Q2 2025, a \$2.8 million reimbursement of excess interest paid to the U.S. Internal Revenue Service

("IRS") related to late payment penalties on tax withholdings for intercompany distributions previously disclosed in 2024, and a \$1.2 million cash distribution from the exit of a legacy equity investment.

Non-interest income for the six months ended June 30, 2026 of \$346.2 million, an increase of \$25.6 million when compared to the same period of the previous year. The main factors that contributed to the variance were:

- higher other service fees by \$16.7 million, primarily driven by an \$11.3 million increase in debit and credit card fees, reflecting growth in transaction activity and higher purchase volumes including those of commercial credit cards, coupled with a \$4.3 million increase in asset management fees driven by higher assets under management; and
- higher other operating income by \$6.2 million, primarily reflecting a \$10.5 million increase in earnings from an investment accounted for under the equity method, partially offset by a \$3.9 million reimbursement of excess interest paid to the U.S. Internal Revenue Service ("IRS") related to late payment penalties on tax withholdings for intercompany distributions, and a \$1.2 million cash distribution from the exit of a legacy equity investment.

#### **Operating Expenses**

Operating expenses for the second quarter of 2026 totaled \$484.1 million, a decrease of \$8.6 million when compared to the same quarter of 2025. The main drivers of the variance were:

- lower other operating expenses by \$10.4 million, attributable to a \$5.6 million decrease in insurance claim reserves compared to the second quarter of 2025 and a \$3.1 million decrease in reserves for operational losses; and
- lower professional fees by \$3.6 million, primarily reflecting lower advisory fees associated with corporate initiatives and regulatory compliance activities,

partially offset by:

- higher technology and software expenses by \$6.3 million, primarily reflecting increased software cost amortization driven by continued investments in technology and transformation initiatives, together with higher IT consulting fees; partially offset by lower network management service expenses.

Operating expenses for the six months ended June 30, 2026 were \$951.4 million, a decrease of \$12.3 million when compared to the same period of 2025. The variance was primarily due to:

- lower other operating expenses by \$19.1 million, primarily due to lower reserves for operational losses by \$5.2 million and lower insurance claim reserves by \$5.6 million, higher gains on the sale of OREO properties by \$3.2 million and a \$2.4 million decrease in pension expense due to a lower discount rate used in the actuarial analysis when compared to the same period of 2025;
- lower professional fees by \$4.9 million, primarily driven by lower advisory expenses associated with corporate initiatives and regulatory compliance activities;

partially offset by:

- higher technology and software expenses by \$11.7 million, primarily attributable to increases in software cost amortization, equipment depreciation, and IT consulting fees driven by continued investments in technology and transformation initiatives; partially offset by lower application and network management service charges; and
- higher personnel costs by \$3.0 million, mainly due to a \$4.1 million increase in salaries driven by higher headcount and annual salary revisions, together with a \$3.2 million increase in other compensation expenses; partially offset by a \$4.2 million decrease in profit-sharing expense when compared to the same period of 2025.

The ETR for the six-month period ended June 30, 2026, was 15.0% compared to 19.3% in the same period for 2025 driven by higher exempt income and other benefits, including the vesting of stock awards, the purchase of tax credits, and income subject to preferential income tax rates.

**REPORTABLE SEGMENT RESULTS**

The Corporation's reportable segments for managerial reporting purposes consist of Banco Popular de Puerto Rico and Popular U.S. A Corporate group has also been defined to support the reportable segments.

For a description of the Corporation's reportable segments, including additional financial information and the underlying management accounting process, refer to **Note 26** to the Consolidated Financial Statements.

The corporate group reported a net income of \$8.8 million for the quarter ended June 30, 2026, compared with a net income of \$3.3 million for the same quarter of the previous year. For the six months ended June 30, 2026, the corporate group reported a net income of \$13.2 million, compared to a net loss of \$0.3 million for the same period of the previous year, mainly due to higher income from equity method investments. There were no intercompany distributions between the U.S. subsidiaries and the bank holding companies.

Highlights on the earnings results for the reportable segments are discussed below:

#### **Banco Popular de Puerto Rico**

The Banco Popular de Puerto Rico ("BPPR") reportable segment's net income amounted to \$232.9 million for the quarter ended June 30, 2026, higher by \$48.4 million when compared to the same quarter of the previous year. The main drivers for a higher income included:

- net interest income increased \$51.4 million to \$589.9 million. The increase was primarily driven by higher income from money market and investment securities by \$10.1 million or three basis points mainly driven by higher income of U.S. Treasury securities and by higher income from loans by \$20.9 million driven by loan growth across most portfolios. The increase was also attributable to a \$20.1 million, or 28 basis point, decrease on interest expense from deposits, primarily due to a 61 basis point reduction in the cost of market-linked Puerto Rico public deposits driven by a decline in short-term market rates when compared to the same period in 2025. NIM expanded 17 basis points to 3.85%. Deposit costs, at 1.32%, were lower by 21 basis points;
- higher non-interest income by \$10.1 million mainly due to higher service fees by \$7.9 million driven by higher debit and credit card fees due to higher transaction activity and higher purchase volumes, as well as an increase in asset management fees;
- lower operating expenses by \$4.1 million mostly due to lower operational loss reserves by \$9.0 million, partially offset by higher technology and software expenses by \$3.1 million due to continuing investments in technology and transformation initiatives and higher professional fees by \$1.1 million; and
- lower income tax expense by \$3.5 million mainly due to higher exempt income;

partially offset by:

- higher provision for credit losses by \$18.6 million which resulted in a provision of \$61.8 million for the quarter ended June 30, 2026. Refer to section "Provision for credit losses-Loans held-in-portfolio and unfunded commitments" in this MD&A for more discussion over the drivers of the provision for credit losses by business segment.

For the six months ended June 30, 2026, the BPPR segment recorded a net income of \$437.3 million compared to a net income of \$350.4 million for the same period of the previous year. The factors that contributed to the variance in the financial results included the following:

- net interest income increased \$97.5 million to \$1.2 billion compared with the same period of 2025. The increase was primarily driven by higher income from loans by \$41.0 million driven by loan growth across most portfolios and higher income from money market and investment securities by \$6.7 million mainly driven by U.S. Treasury securities, partially offset by lower income from money market investments. The increase was also attributable to a \$49.5 million, or 30 basis points, decrease in interest expense on deposits, primarily due to a 64 basis point reduction in the cost of market-linked Puerto Rico public deposits driven by a decline in short-term market rates. NIM expanded 20 basis points to 3.86%. Deposit costs, at 1.31%, were lower by 23 basis points;
- higher non-interest income by \$17.3 million mainly due to higher service fees by \$14.8 mainly due to higher debit and credit card fees driven by higher transaction activity and higher purchase volumes, as well as an increase in asset management fees;
- lower operating expenses by \$6.3 million mostly due to lower operational losses by \$11.0 million and higher gains on repossessed unit sales by \$3.2 million, partially offset by higher technology and software expenses by \$4.7 million due to continuing investments in technology and transformation initiatives, and higher personnel costs by \$2.1 million mainly due to an increase in salaries expenses driven by exempt employees; and
- lower income tax expense by \$6.4 million due mainly to higher exempt income;

partially offset by:

- the provision for credit losses increased by \$39.2 million to \$135.1 million. Refer to section "Provision for credit losses-Loans held-in-portfolio and unfunded commitments" in this MD&A for more discussion over the drivers of the provision for credit losses by business segment.

#### **Popular U.S.**

For the quarter ended June 30, 2026, the reportable segment of Popular U.S. reported a net income of \$36.6 million, compared with a net income of \$22.6 million for the same quarter of the previous year. The main drivers for higher net income are the following:

- Net interest income increased \$10.9 million to \$113.1 million. The increase was primarily driven by higher income from loans resulting from higher average balances and yields in the commercial portfolio by 16 basis points, or \$8.8 million. The increase was also due to a \$5.1 million, or 24 basis points, decrease in interest expense on deposits, primarily due to repricing across most deposit products driven by a decline in short-term market rates; and

[Table of Content](#)

- the provision for loan losses was \$3.4 million, a decrease of \$3.0 million. Refer to section "Provision for credit losses-Loans held-in-portfolio and unfunded commitments" in this MD&A for more discussion over the drivers of the provision for credit losses by business segment;

partially offset by:

- higher income tax expense by \$5.0 million due to higher income before tax.

For the six months ended June 30, 2026, the reportable segment of Popular U.S. recorded a net income of \$73.6 million, compared with a net income of \$37.4 million for the same period of the previous year. The factors that contributed to the variance in the financial results included the following:

- Net interest income increased \$29.6 million to \$224.8 million. The increase was primarily driven by higher income from loans resulting from higher average balances and yields in the commercial portfolio. The increase also benefited from a \$16.1 million, or 34 basis point, decrease in deposit interest expense, primarily due to repricing across most deposit products driven by a decline in short-term market rates; and
- provision for loan losses was \$5.8 million, a decrease of \$13.1 million. Refer to section Provision for Credit Losses-Loans Held-in-Portfolio and Unfunded Commitments in this MD&A for more discussion over the drivers of the provision for credit losses by business segment;

partially offset by:

- higher income tax expense by \$13.0 million due to higher income before tax.

## STATEMENT OF FINANCIAL CONDITION ANALYSIS

### Assets

The Corporation's total assets were \$79.0 billion at June 30, 2026, compared to \$75.3 billion at December 31, 2025. The variance in total assets of \$3.7 billion was driven by an increase in AFS securities and loan growth across most portfolios, partially offset by a decrease in HTM securities. Refer to the Consolidated Statements of Financial Condition included in this report and to the following narrative for additional information.

#### Money market investments and investment securities

Money market investments decreased by \$71.0 million as of June 30, 2026, when compared to December 31, 2025, due to the use of funds for loan growth and to the purchase of U.S. Treasury securities. AFS securities increased \$4.2 billion, driven by investment in U.S. Treasury securities of \$4.5 billion, partially offset by maturities and principal paydowns, mainly in mortgage-backed securities ("MBS") and higher unrealized losses in AFS securities of \$94.0 million. HTM securities decreased by \$1.1 billion driven by maturities, partially offset by the accretion of \$90.8 million of the discount related to U.S. Treasury securities previously reclassified from AFS to HTM. Refer to **Note 5** and to **Note 6** to the Consolidated Financial Statements for additional information with respect to the Corporation's debt securities available-for-sale and held-to-maturity.

#### Loans

Loans held-in-portfolio were \$39.7 billion at June 30, 2026, an increase of \$422.3 million when compared to December 31, 2025. In the BPPR segment loan balances increased by \$318.2 million, mainly in the mortgage, commercial and construction portfolios. The Popular U.S. segment also increased by \$104.1 million mainly due to higher commercial real estate loans, partially offset by lower commercial multi-family and runoff from the exited residential mortgage business.

At June 30, 2026, the Corporation's loans to non-depository financial institutions ("NDFIs") amounted to \$551.4 million, an increase of \$6.4 million, compared to December 31, 2025. This increase was related to higher mortgage credit intermediaries by \$24.8 million, mostly in Popular Bank, partially offset by decreases of \$11.2 million in consumer and commercial credit intermediaries and \$7.2 million in insurance companies. At June 30, 2026, the Corporation's exposure to NDFIs was composed of \$262.1 million to insurance companies for general corporate purposes unrelated to lending activities, \$162.7 million related to consumer and commercial credit intermediaries, and \$126.5 million related to mortgage credit intermediaries. All loans to NDFIs are current in their contractual payments and carry a 'pass' rating.

Refer to Table 5 for a breakdown of the Corporation's loan portfolio. Also, refer to **Note 7** in the Consolidated Financial Statements for detailed information about the Corporation's loan portfolio composition and loan purchases and sales.

#### Other assets

Other assets amounted to \$1.8 billion at June 30, 2026, an increase of \$56.2 million when compared to \$1.7 billion at December 31, 2025. The variance was mainly driven by an increase of \$33.6 million in investments under the equity method, primarily due to the equity pickup from our investment in BHD, and an increase in prepaid taxes, mainly municipal taxes of \$22.4 million. Refer to **Note 10** to the Consolidated Financial Statements for a breakdown of the principal categories that comprise the caption of "Other Assets" in the Consolidated Statements of Financial Condition at June 30, 2026 and December 31, 2025.

#### **Liabilities**

The Corporation's total liabilities were \$72.5 billion at June 30, 2026, an increase of \$3.4 billion, when compared to December 31, 2025. The following is a discussion of the significant changes in liabilities.

#### Deposits and Borrowings

##### Total Deposits

The Corporation's deposits totaled \$70.2 billion as of June 30, 2026, compared to \$66.2 billion as of December 31, 2025. Ending deposit balances increased by \$4.0 billion, while average quarterly balances grew by \$3.0 billion. The average deposit balance, excluding P.R. public deposits, increased by \$1.2 billion.

At the end of the second quarter of 2026, P.R. public deposits were \$22.7 billion, representing 32% of total deposits. P.R. public deposits are expected to range between \$20 billion and \$22 billion through the end of 2026. However, the rate at which public deposit balances may change is uncertain and difficult to predict. The amount and timing of any such change is likely to be impacted by, for example, the level of federal assistance and speed at which it is distributed, the use of local funds to cover federal assistance programs during the U.S. government shutdown, the financial condition, liquidity and cash management practices of the Puerto Rico Government and its instrumentalities, and the implementation of fiscal and debt adjustment plans approved pursuant to PROMESA or other actions mandated by the Fiscal Oversight and Management Board for Puerto Rico (the "Oversight Board") or by reductions in federal funding available for Puerto Rico. P.R. public deposits costs are generally indexed to changes in short-term market rates with a one-quarter lag, in accordance with contractual terms. As a result, these deposits' costs have typically lagged variable asset repricing. These deposits require that the bank pledge high credit quality securities as collateral; therefore, liquidity risks arising from deposit outflows are lower. Total deposit costs, excluding P.R. public deposits, demonstrate the stability of core deposits, low cost and low betas.

The volume and cost of P.R. public deposits and the proportion of high-cost deposits in the U.S. directly impact the balance and mix of earning assets and therefore represent a key factor in the Corporation's ability to expand its net interest margin.

Refer to Table 6 for a breakdown of the Corporation's deposits at June 30, 2026 and December 31, 2025.

#### Borrowings

The Corporation's borrowings totaled \$1.5 billion at June 30, 2026 compared to \$1.4 billion at December 31, 2025. Refer to **Note 12** to the Consolidated Financial Statements for detailed information on the Corporation's borrowings. Also, refer to the Liquidity section in this MD&A for additional information on the Corporation's funding sources.

#### **Stockholders' Equity**

Stockholders' equity totaled \$6.4 billion at June 30, 2026, an increase of \$183.9 million when compared to December 31, 2025. The increase was principally due to net income for the six months ended June 30, 2026 of \$523.9 million, the amortization of unrealized losses from securities previously reclassified to HTM of \$72.6 million and a favorable variance in foreign currency translation adjustments of \$22 million from our investment in BHD, partially offset by the after-tax effect of higher net unrealized losses in the AFS securities portfolio of \$74.9 million and an increase in treasury stock of \$277.9 million, mainly due to common stock repurchases, and common and preferred dividends declared of \$97.5 million. Refer to the Consolidated Statements of Financial Condition, Comprehensive Income and Changes in Stockholders' Equity for information on the composition of stockholders' equity.

During the six months ended June 30, 2026, Popular repurchased 1,988,767 shares of common stock for \$280.5 million at an average price of \$141.04 per share.

The composition of the Corporation's financing to total assets at June 30, 2026 and December 31, 2025 is included in Table 7.

#### **CAPITAL**

##### *Regulatory Capital*

The Corporation, BPPR and PB are subject to regulatory capital requirements established by the Federal Reserve Board. The risk-based capital standards applicable to the Corporation, BPPR and PB ("Basel III capital rules") are based on the final capital framework for strengthening international capital standards, known as Basel III, of the Basel Committee on Banking Supervision. As of June 30, 2026, the Corporation's, BPPR's and PB's capital ratios continue to exceed the minimum requirements for being "well-capitalized".

The risk-based capital ratios presented in Table 8, which include common equity tier 1, Tier 1 capital, total capital and leverage capital as of June 30, 2026 and December 31, 2025.

The Basel III capital rules provide that a depository institution is deemed to be well capitalized if it maintains a leverage ratio of at least 5%, a common equity Tier 1 ratio of at least 6.5%, a Tier 1 capital ratio of at least 8% and a total risk-based ratio of at least 10%. The Corporation, BPPR and PB leverage ratio, common equity Tier 1 ratio and Tier 1 capital ratio, respectively as of June 30, 2026, continue to exceed the minimum requirements for being "well-capitalized" under the Basel III capital rules.

The increase in the common equity Tier I capital ratio, Tier I capital ratio, and total capital ratio, as of June 30, 2026 as compared to December 31, 2025 was mainly due to the six month period's earnings, partially offset by the repurchase of common stock, common stock dividends, and higher risk weighted assets driven by the increase in loans held-in-portfolio. The decrease in the leverage ratio was driven by higher total assets which are impacted by zero-risk weighted assets that did not have a significant impact on the risk weighted assets, partially offset by the six month period's earnings.

## RISK MANAGEMENT

### Market / Interest Rate Risk

The Corporation's assets that are mainly subject to market valuation risk are debt securities classified as available-for-sale. Refer to **Note 5** and **Note 6** to the Consolidated Financial Statements for further information on the debt securities available-for-sale and held-to-maturity portfolios. Debt securities classified as available-for-sale and held-to-maturity amounted to \$24.8 billion and \$6.2 billion, respectively, as of June 30, 2026. Other assets subject to market risk include mortgage servicing rights ("MSRs") with a fair value of \$ 94.5 million as of June 30, 2026.

#### Interest Rate Risk ("IRR")

The Corporation's net interest income is subject to various categories of interest rate risk, including repricing, basis, yield curve and option risks. In managing interest rate risk, management may alter the mix of floating and fixed rate assets and liabilities, change pricing schedules, adjust maturities through sales and purchases of investment securities, and enter into derivative contracts, among other alternatives.

Management utilizes various tools to assess IRR, including NII simulation modeling, static gap analysis, and Economic Value of Equity ("EVE") to monitor the risk arising from the dynamic characteristics of assets and liabilities subject to IRR. The three methodologies complement each other and are used jointly in the evaluation of the Corporation's IRR. NII simulation modeling is prepared for a five-year period, which in conjunction with the EVE analysis, provides management a better view of long-term IRR.

The Corporation processes NII simulations under interest rate scenarios in which the yield curve is assumed to rise and decline by the same magnitude (parallel shifts). The rate scenarios considered in these market risk simulations include instantaneous parallel changes of -100, -200, +100, and +200 basis points during the succeeding twelve-month period. Assumptions included in these analyses include that the balance sheet remains flat, relative levels of market interest rates across all yield curve points and indexes, interest rate spreads, loan prepayments and deposit elasticity. Thus, they should not be relied upon as indicative of actual results and do not contemplate actions that

[Table of Content](#)

management may engage in as a response to future changes in interest rates. Additionally, the Corporation is also subject to the risk inherent in the use of different rate indexes for the repricing of assets and liabilities, as well as the risk of pricing lags due to contractual or timing differences between the market and management response to changes in the rate environment. These forward-looking computations are management's best estimate based on known and available information and actual results may differ.

The following table presents the results of the simulations at June 30, 2026 and December 31, 2025, assuming a static balance sheet and parallel changes over flat spot rates over a one-year time horizon:

| -200 basis points              | 16,617        | 0.58           | 7,488             | 0.27           |

As of June 30, 2026, NII simulations showed that the Corporation's sensitivity position was liability sensitive. The variation in results as compared to December 31, 2025, was mainly due to an increase in market-linked Puerto Rico public sector deposits, partly offset by an increase in U.S. Treasury Bills. The profile reflects that in rising rate scenarios, the Corporation's net interest income would slightly decline during the one-year horizon due mainly to the large proportion of market-linked Puerto Rico public sector deposits, offset in part by variable rate loan repricing and intermediate maturity assets coming due within one year.

The Corporation's loan and investment portfolios are subject to prepayment risk. Prepayment risk also could have a significant impact on the duration of mortgage-backed securities and collateralized mortgage obligations.

**Trading**

The Corporation engages in trading activities in the ordinary course of business at its subsidiaries, BPPR and Popular Securities. Popular Securities' trading activities consist primarily of market-making activities to meet expected customers' needs related to its retail brokerage business, and purchases and sales of U.S. Government and government sponsored securities with the objective of realizing gains from expected short-term price movements. BPPR's trading activities consist primarily of holding U.S. Government sponsored mortgage-backed securities and economic hedges of the related market risk with "TBA" (to-be-announced) market transactions. In addition, BPPR uses forward contracts or TBAs that have characteristics similar to that of the forecasted security and its conversion timeline to hedge its securitization pipeline.

At June 30, 2026, the Corporation held trading securities with a fair value of \$31.2 million, representing 0.04% of the Corporation's total assets, compared with \$36.6 million and 0.05%, respectively, at December 31, 2025. The trading portfolio consists principally of investment grade securities such as mortgage-backed securities of \$26.7 million with a weighted average yield of 5.04% and U.S. Treasuries of \$3.7 million with a weighted average yield of 2.00% at June 30, 2026 and \$23.4 million with a yield of 5.20% and \$12.5 million with a yield of 2.57%, respectively, as of December 31, 2025.

The Corporation's trading activities are limited by internal policies. For each of the two subsidiaries, the market risk assumed under trading activities is measured by the 5-day net value-at-risk ("VAR"), with a confidence level of 99%. The VAR measures the maximum estimated loss that may occur over a 5-day holding period, given a 99% probability.

The Corporation's trading portfolio had a 5-day VAR of \$0.4 million for the last week in June 2026. VAR models include assumptions and estimates thus actual results could differ from the outputs from these models and assumptions. Back-testing is performed on model results to compare actual results against maximum estimated losses, in order to evaluate model and assumptions accuracy.

In the opinion of management, the size and composition of the trading portfolio does not represent a significant source of market risk for the Corporation.

**Liquidity**

**Liquidity Risk Management Process**

The Corporation has adopted policies and limits to monitor the Corporation's liquidity position and that of its banking subsidiaries. Refer to the Enterprise Risk Management section of Management's Discussion and Analysis included in the 2025 Form 10-K for information on the framework in place to monitor, review, and approve policies to measure, limit and manage funding activities and strategies impacting liquidity risk. Additionally, contingency funding plans are used to model various stress events of different magnitudes that affect different time

horizons, to assist management in evaluating the size of the liquidity buffers needed if those events occur. However, such models may not predict accurately how the market and customers might react to every event and are dependent on many assumptions. The objective of effective liquidity management is to ensure that the Corporation has sufficient liquidity to meet all its financial obligations, finance expected future growth, fund planned capital distributions and maintain a reasonable safety margin for cash needs under both normal and stressed market conditions.

#### Sources of Liquidity

Deposits, including customer deposits, brokered deposits and public funds deposits, continue to be the most significant source of funds for the Corporation, representing 89% of funding of the Corporation's total assets as of June 30, 2026 and 88% as of December 31, 2025. The ratio of total ending loans to deposits remained at 57% at June 30, 2026 and 59% at December 31, 2025. In addition to traditional deposits, the Corporation maintains borrowing arrangements, which amounted to \$1.5 billion in outstanding balances at June 30, 2026 (December 31, 2025 - \$1.4 billion). A detailed description of the Corporation's borrowings, including their terms, is included in Note 12 to the Consolidated Financial Statements. Also, the Consolidated Statements of Cash Flows in the accompanying Consolidated Financial Statements provide information on the Corporation's cash inflows and outflows.

The following sections provide further information on the Corporation's major funding activities and needs, as well as the risks involved in these activities.

#### Banking Subsidiaries

Primary sources of funding for the Corporation's banking subsidiaries (BPPR and PB or, collectively, "the banking subsidiaries") include retail, commercial and public sector deposits, brokered deposits, unpledged investment securities, mortgage loan securitization and, to a lesser extent, loan sales. In addition, the Corporation maintains borrowing facilities with the FHLB and at the discount window of the Federal Reserve Bank of New York (the "FRB") and has a considerable amount of collateral pledged that can be used to raise funds under these facilities.

At June 30, 2026, the Corporation's available liquidity decreased to \$26.3 billion from \$27.0 billion on December 31, 2025. During the second quarter of 2026, the Corporation continued to have significant on-balance sheet and off-balance sheet sources of liquidity. The liquidity sources of the Corporation at June 30, 2026 are presented in Table 11 below:

**Table 11 - Liquidity Sources**

Refer to **Note 15** to the Consolidated Financial Statements for additional information of the Corporation's borrowing facilities available through its banking subsidiaries.

The principal uses of funds for the banking subsidiaries include loan originations, investment portfolio purchases, loan purchases and repurchases, repayment of outstanding obligations (including deposits), advances on certain serviced portfolios and operational expenses. Also, the banking subsidiaries assume liquidity risk related to collateral posting requirements for certain activities mainly in connection with contractual commitments, recourse provisions, servicing advances, derivatives and credit card licensing agreements.

The banking subsidiaries maintain sufficient funding capacity to address large increases in funding requirements such as deposit outflows. The Corporation has established liquidity guidelines that require the banking subsidiaries to have sufficient liquidity to cover all short-term borrowings and a portion of deposits.

Deposits are a key source of funding. Refer to Table 6 for a breakdown of deposits by major types. Core deposits are generated from a large base of consumer, corporate and public sector customers. Core deposits include certificates of deposit under \$250,000, all interest-bearing transactional deposit accounts, non-interest-bearing deposits, and savings deposits. Core deposits exclude brokered deposits and certificates of deposit over \$250,000. Core deposits, excluding P.R. public funds, which are fully collateralized, have historically provided the

Corporation with a sizable source of relatively stable and low-cost funds. P.R. public funds, while linked to market interest rates, provide a stable source of funding with an attractive earning spread. As of June 30, 2026, total Puerto Rico public sector deposits were \$22.7 billion, compared to \$19.4 billion at December 31, 2025.

Core deposits represented 91% of total deposits at \$64.1 billion, as of June 30, 2026, compared with 92% at \$60.9 billion as of December 31, 2025. Core deposits financed 84% of the Corporation's earning assets at June 30, 2026, compared to 85% at December 31, 2025.

The distribution by maturity of certificates of deposit with denominations of \$250,000 and over at June 30, 2026 is presented in the table that follows:

**Table 12 - Distribution by Maturity of Certificates of Deposit of \$250,000 and Over**

|------------------------|---------------------|
| 3 months or less       | \$ 2,797,544        |
| Over 3 to 12 months    | 1,059,243           |
| Over 1 year to 3 years | 317,536             |
| Over 3 years           | 124,493             |
| <b>Total</b>           | <b>\$ 4,298,816</b> |

The Corporation had \$1.0 billion in brokered deposits at June 30, 2026, which financed approximately 1% of its total assets (December 31, 2025 - \$1.0 billion and 1%, respectively).

As of June 30, 2026, the banking subsidiaries had sufficient current and projected liquidity sources to meet their anticipated cash flow obligations, as well as special needs and off-balance sheet commitments, in the ordinary course of business and have sufficient liquidity resources to address a stress event. Although the banking subsidiaries have historically been able to replace maturing deposits and advances, no assurance can be given that they would be able to replace those funds in the future if the Corporation's financial condition or general market conditions were to deteriorate. The Corporation's financial flexibility would be severely constrained if the banking subsidiaries are unable to maintain access to funding or if adequate funding is not available to accommodate future financing needs at acceptable interest rates. The banking subsidiaries also are required to deposit cash or qualifying securities to meet margin requirements on repurchase agreements, deposit agreements and other collateralized borrowing facilities. To the extent that the value of securities previously pledged as collateral declines because of market changes, the Corporation will be required to deposit additional cash or securities to meet its margin or collateral requirements and would need to rely more heavily on alternative funding sources. In these scenarios, the Corporation's financial flexibility and ability to grow revenues may not increase proportionately to cover costs and profitability would be adversely affected.

The Corporation considers balances in excess of \$250,000 to have a higher potential liquidity risk. Table 13 reflects the aggregate balance in deposit accounts in excess of \$250,000, including collateralized public funds and deposits outside of the U.S. and its territories. Collateralized public funds, as presented in Table 13, represent public deposit balances from governmental entities in the U.S. and its territories, including Puerto Rico and the United States Virgin Islands, collateralized based on such jurisdictions' applicable collateral requirements.

#### Bank Holding Companies

The principal sources of funding for the BHCs, which are Popular, Inc. (holding company only) and PNA, include cash on hand, investment securities, dividends received from banking and non-banking subsidiaries, asset sales, credit facilities available from affiliate banking subsidiaries and proceeds from potential securities offerings. Dividends from banking and non-banking subsidiaries are subject to various regulatory limits and authorization requirements imposed by banking regulators, including the FED and the NYDFS, that may limit the ability of those subsidiaries to act as a source of funding to the BHCs.

The principal uses of these funds include the repayment of debt, interest payments to holders of senior debt and junior subordinated deferrable interest debentures (related to trust preferred securities), the payment of dividends to common stockholders, repurchases of the Corporation's securities and capitalizing its subsidiaries.

The outstanding balance of notes payable at the BHCs amounted to \$595.7 million at June 30, 2026 and \$595.0 million December 31, 2025.

The contractual maturities of the BHCs notes payable at June 30, 2026 are presented in Table 14.

**Table 14 - Distribution of BHC's Notes Payable by Contractual Maturity**

| Year        | (In thousands) |
|-------------|----------------|
| 2028        | \$ 397,277     |
| Later years | 198,413        |
| Total       | \$ 595,690     |

As of June 30, 2026, the BHCs had cash and money markets investments totaling \$316 million and borrowing potential of \$165 million from its secured facility with BPPR. The BHCs' liquidity position continues to be adequate with sufficient cash on hand, investments and other sources of liquidity that are expected to be sufficient to meet all interest payments and dividend obligations for the foreseeable future. Additionally, the Corporation's latest quarterly paid dividend was \$0.75 per share or approximately \$48.1 million per quarter.

The BHCs have in the past borrowed in the corporate debt market primarily to finance their non-banking subsidiaries and refinance debt obligations. These sources of funding are more costly given that two out of three principal credit rating agencies rate the Corporation's debt securities below "investment grade". The Corporation has a shelf registration statement filed and effective with the Securities and Exchange Commission, which permits the Corporation to issue an unspecified amount of debt or equity securities.

#### Non-Banking Subsidiaries

The principal sources of funding for the non-banking subsidiaries include internally generated cash flows from operations, loan sales, repurchase agreements, capital injections and borrowed funds from their direct parent companies or the holding companies. The principal uses of funds for the non-banking subsidiaries include repayment of maturing debt, operational expenses and payment of dividends to the BHCs.

#### Dividends

During the six months ended June 30, 2026, the Corporation declared cash dividends of \$1.50 per common share outstanding (\$96.8 million in the aggregate). The dividends for the Corporation's Series A preferred stock amounted to \$0.7 million for the six months ended on June 30, 2026. On July 23, 2026, the Corporation announced an increase in its quarterly common stock dividend from \$0.75 to \$0.90 per share, commencing with the dividend payable in the fourth quarter of 2026, subject to the approval by the Corporation's Board of Directors.

During the six months ended June 30, 2026, the BHCs received dividends and distributions amounting to \$175 million from BPPR and \$30 million from its other non-banking subsidiaries. Dividends from BPPR constitute Popular, Inc.'s primary source of liquidity. In addition, during the six months ended June 30, 2026, PIBI, a wholly owned subsidiary of Popular, Inc., had no dividends.

In addition to regulatory limits previously discussed, the ability of a bank subsidiary to up-stream dividends to its BHC could be impacted by its financial performance and capital, including tangible and regulatory capital, thus potentially limiting the amount of cash up-streamed to the BHCs from the banking subsidiaries. This could, in turn, affect BHC's ability to declare dividends on its outstanding common and preferred stock, repurchase its securities or meet its debt obligations, for example. At June 30, 2026, BPPR could declare a dividend of up to approximately \$237 million without prior approval of the Federal Reserve Board due to its retained income, declared dividend activity and transfers to statutory reserves over the measurement period. In addition, pursuant to the FRB requirements, PB may not declare or pay a dividend without the prior approval of the Federal Reserve Board and the NYSDFS.

#### Other Funding Sources and Capital

In addition to cash reserves held at the FRB that totaled \$4.6 billion at June 30, 2026, the debt securities portfolio provides an additional source of liquidity, which may be realized through either securities sales, collateralized borrowings or repurchase agreements. The Corporation's debt securities portfolio consists primarily of liquid U.S. government debt securities, U.S. government sponsored agency debt securities, U.S. government sponsored agency mortgage-backed securities, and U.S. government sponsored agency collateralized mortgage obligations that can be used to raise funds in the repo markets. The availability of repurchase agreements would be subject to having sufficient unpledged collateral available at the time the transactions are consummated, in addition to overall liquidity and risk appetite of the various counterparties. Refer to Table 11 for details of the Corporation's unpledged debt securities and available credit facilities with the FHLB and the discount window of the Federal Reserve Bank. A substantial portion of these debt securities could be used to raise financing in the U.S. money markets or from secured lending sources, subject to changes in their fair market value and customary adjustments (haircuts).

Additional liquidity may be provided through loan maturities, prepayments and sales. The loan portfolio provides a source of collateral to secure the available credit facilities with the FHLB and the discount window of the Federal Reserve Bank. The loan portfolio can also be used to obtain funding in the capital markets. Mortgage loans and some types of consumer loans, have secondary markets which the Corporation could use.

#### Off-Balance Sheet Arrangements and Other Commitments

In the ordinary course of business, the Corporation engages in financial transactions that are not recorded on the balance sheet or may be recorded on the balance sheet in amounts that are different than the full contract or notional amount of the transaction. As a provider of financial services, the Corporation routinely enters into commitments with off-balance sheet risk to meet the financial needs of its customers. Refer to **Note 16** to the Consolidated Financial Statements for information on the Corporation's commitments to extend credit and other non-credit commitments.

Other types of off-balance sheet arrangements that the Corporation enters in the ordinary course of business include derivatives, operating leases and provision of guarantees, indemnifications, and representation and warranties. Refer **Note 15** to the Consolidated Financial Statements for a detailed discussion related to the Corporation's guarantees, indemnifications obligations, and representation and warranties arrangements.

The Corporation monitors its cash requirements, including its contractual obligations and debt commitments.

#### Financial Information of Guarantor and Issuers of Registered Guaranteed Securities

The principal sources of funding for Popular, Inc. Holding Company ("PIHC") and Popular North America, Inc. ("PNA") have included dividends received from their banking and non-banking subsidiaries subject to statutory provisions that limit dividends paid by the banking subsidiary without regulatory approval, asset sales and proceeds from the issuance of debt and equity.

The Corporation ("PIHC") is the parent holding company of Popular North America ("PNA") and operates financial services through its subsidiaries. PNA, a wholly owned subsidiary of Popular, Inc., manages entities such as Equity One, Inc., and PB, including PB's subsidiaries: Popular Equipment Finance, LLC, Popular Insurance Agency, U.S.A., and E-LOAN, Inc.

PNA has issued junior subordinated debentures guaranteed by PIHC (the "obligor group"), purchased by statutory trusts established by the Corporation using proceeds from trust preferred securities ("capital securities") and common securities of the trusts.

PIHC guarantees the junior subordinated debentures issued by PNA. If PIHC fails to make interest payments on the debentures held by the trust, the trust will not distribute payments on the capital securities. The guarantee ranks subordinate and junior in right of payment to all other liabilities of PIHC and equally with all other PIHC-issued guarantees, allowing direct legal action against PIHC without involving other entities.

Funding for PIHC and PNA includes dividends from subsidiaries, asset sales, and proceeds from debt and equity issuance. Statutory provisions limit the dividends an insured depository institution can pay to its holding company without regulatory approval.

The summarized financial information below shows the combined financial position of the obligor group as of June 30, 2026 and December 31, 2025, and the results of their operations for the six-month periods ended June 30, 2026 and June 30, 2025. Excluded are investments and equity in earnings from subsidiaries and affiliates outside the obligor group.

Intercompany balances and transactions within the obligor group have been eliminated. Material amounts due from, due to, and transactions with subsidiaries and affiliates are shown separately. Related party transactions are also presented separately.

#### Risk to Liquidity

The Corporation's liquidity may come under pressure if it experiences significant unexpected cash outflows due to deposit withdrawals, which could arise from various factors like economic conditions, loss of depositor confidence, competition, exogenous events, regulatory requirements or changes, a downgrade in credit rating, or other events causing counterparties to avoid exposure.

Investors should refer to Liquidity Risks section of "Part I, Item 1 A" of 2025 Form 10-K for an additional discussion of liquidity risks to which the Corporation is subject.

#### **Credit Risk**

##### **Geographic and Government Risk**

The Corporation is exposed to geographic and government risk. The Corporation's assets and revenue composition by geographical area and by business segment reporting are presented in **Note 26** to the Consolidated Financial Statements. Readers should refer to Economic and Market Risk section and Business Risk Section of "Part I, Item 1A" of the 2025 Form 10-K for an additional discussion on how the

Corporation is impacted by global and local economic and market conditions, including weakness in the economy, particularly in Puerto Rico, where a significant portion of our business is concentrated. This section also addresses how our credit risk and credit losses can increase to the extent our loans are concentrated on borrowers engaged in the same or similar activities or in borrowers who as a group may be uniquely or disproportionately affected by certain economic or market conditions.

#### **Commonwealth of Puerto Rico**

A significant portion of our financial activities and credit exposure is concentrated in the Commonwealth of Puerto Rico ("Puerto Rico") which has faced severe economic and fiscal challenges in the past and may face additional challenges in the future.

#### **Economic Performance**

Based on the latest estimates of the Puerto Rico Planning Board, real GNP in Puerto Rico is projected to have grown by 0.4% in fiscal year 2026 (July 2025-June 2026) and by 0.3% in fiscal year 2027 (July 2026-June 2027). Meanwhile, the Puerto Rico Economic Activity Index reflected a 0.7% year-over-year decrease in May 2026. While this index is not a direct measure of real GNP, it serves as an indicator of ongoing economic activity.

In 2021 and 2022, inflation rose sharply in the U.S. and Puerto Rico due to post-pandemic demand and supply chain disruptions. Inflation began to decrease by mid-2022 as the Federal Reserve raised interest rates, largely stabilizing by September 2024, leading to a series of rate reductions by the Federal Reserve for the first time in four years. As of June 2026, the U.S. Consumer Price Index reflected a 3.5% year-over-year increase, which, while below peak 2022 levels, remains above the Federal Reserve's 2% target. The annual rate of inflation has increased since February 2026 (2.4%), primarily driven by higher energy and gasoline prices resulting from the recent geopolitical conflict involving Iran. In Puerto Rico, the Consumer Price Index reflected a year-over-year increase of 4.6% in May 2026, up from 4% in April 2026. The full the extent to which the conflict in Iran may impact the global and Puerto Rico economies has yet to be determined.

#### **Fiscal Challenges of Puerto Rico and its Municipalities**

As Puerto Rico's economy contracted in the 2000s, public debt increased rapidly due to borrowing to cover deficits to pay debt service, pension benefits, and other expenditures. By 2016, the government had over \$120 billion in combined debt and unfunded pension liabilities, lost access to capital markets, and faced a fiscal crisis.

In response, the U.S. Congress enacted PROMESA in June 2016. PROMESA established an Oversight Board with significant control over Puerto Rico's fiscal and economic affairs, including those of its public corporations, instrumentalities and municipalities (collectively, "PR Government Entities").

In August 2025, President Donald J. Trump dismissed six of the seven members of the Oversight Board, reportedly due to inefficient leadership and excessive spending. Three of the dismissed members subsequently filed suit in federal court challenging the legality of their dismissal. On October 3, 2025, the court issued a preliminary injunction that effectively reinstated such members and barred the seating of replacement members while the case proceeds. Such ruling was appealed to the United States Court of Appeals for the First Circuit on December 3, 2025, and the appeal remains pending. It is still too early to determine what impact these developments may have on Puerto Rico's fiscal and economic affairs.

Under PROMESA, the Oversight Board will remain in place until market access is restored and balanced budgets are achieved for at least four consecutive years. PROMESA also established two mechanisms for the restructuring of the obligations of PR Government Entities: (a) Title III, an in-court process akin to that of the U.S. Bankruptcy Code and which permits adjustment of a broad range of obligations, and (b) Title VI, a largely out-of-court process through which a supermajority of creditors can accept modifications to debt and bind holdouts.

Since 2017, Puerto Rico and several of its instrumentalities have availed themselves of these mechanisms. The Puerto Rico government exited Title III in March 2022, and several instrumentalities, such as the Government Development Bank and the Puerto Rico Highways and Transportation Authority have also completed debt restructurings under Titles III or VI of PROMESA. However, the Puerto Rico Electric Power Authority is still undergoing its debt restructuring.

Puerto Rico's economic difficulties have also impacted its municipalities. Historically, the central government provided significant municipal subsidies. However, these have decreased pursuant to fiscal measures required by the Oversight Board. This decline has been partly offset by federal disaster and COVID-relief funding received by municipalities in recent years. The latest Puerto Rico fiscal plan proposes a restructured grant system to enhance municipal services and encourage accountability through performance metrics.

Municipalities are subject to PROMESA, and the Oversight Board has required certain municipalities to submit fiscal plans and annual budgets for review and approval. Municipalities are also required to seek Oversight Board approval to issue, guarantee or modify their debts and to enter into significant contracts. To date no municipality has availed itself of the debt restructuring mechanisms available to them under PROMESA.

#### Exposure of the Corporation

The credit quality of BPPR's loan portfolio is closely tied to the economic conditions in Puerto Rico. Deterioration in the Puerto Rico economy could potentially increase delinquencies and charge-offs, thereby impacting the Corporation's financial health. The Corporation has direct exposure to P.R. Government Entities, which are mainly concentrated in obligations from various Puerto Rico municipalities. Additionally, the Corporation holds loans and securities insured by P.R. Government Entities, such as the Housing Finance Authority, whose ability to honor guarantees depends on its financial condition. BPPR's commercial, mortgage, and consumer loan portfolios are also exposed to risks from private borrowers who are service providers or have other relationships with the Puerto Rico government and government employees who could be negatively affected by Puerto Rico's fiscal challenges. For further discussion of the Corporation's direct and indirect exposure to the Puerto Rico government and its instrumentalities and municipalities, please refer to **Note 16 – Commitments and Contingencies** to the Consolidated Financial Statements.

The Corporation also maintains significant deposits from P.R. Government Entities, with future balances subject to various uncertainties. Further information on Puerto Rico Government deposits is included in **Note 11 – Deposits** to the Consolidated Financial Statements.

#### United States Virgin Islands

The Corporation has operations in the United States Virgin Islands (the "USVI") and has credit exposure to USVI government entities. For further discussion of the Corporation's direct and indirect exposure to USVI government entities, please refer to **Note 16**.

#### ***Non-Performing Assets ("NPAs")***

NPAs include primarily past-due loans that are no longer accruing interest, renegotiated loans, and real estate property acquired through foreclosure. A summary, including certain credit quality metrics, is presented in Table 17.

During the second quarter of 2026, the Corporation's overall credit quality metrics remained stable. The quarter included the resolution of a significant \$155.0 million non-performing commercial relationship, which resulted in a \$71.3 million charge-off and the transfer of the remaining \$83.7 million carrying amount to loans held-for-sale ("LHFS"). Consumer credit performance continued to improve, supported by lower losses in the auto portfolio. Commercial NPL inflows increased during the quarter, driven by borrower-specific issues that management does not view as indicative of broader credit deterioration.

Total NPAs of \$546.7 million as of June 30, 2026 increased by \$5.9 million when compared with December 31, 2025. Total NPLs of \$413.4 million decreased by \$84.9 million from December 31, 2025. BPPR's NPLs decreased by \$90.9 million, primarily driven by reductions in commercial and consumer NPLs of \$64.5 million and \$21.2 million, respectively. The decline in the commercial NPLs reflects the resolution of a \$155.0 million relationship, described above. The loan was subsequently sold on July 2, 2026. The decrease resulting from the reclassification of the loan previously mentioned was partially offset by the inflows to commercial NPLs of two unrelated commercial and industrial relationships of \$129 million in the aggregate. These inflows to commercial NPLs stemmed from issues specific to the individual borrowers and are not indicative of a broader decline in portfolio credit quality or the industries in which the borrowers operate. Popular U.S. NPLs increased by \$6.0 million, mostly driven by higher commercial NPLs by \$9.2 million, offset in part by a decrease of \$3.2 million in the mortgage NPLs.

On June 30, 2026, the ratio of NPLs to total loans held-in-portfolio was 1.04%, compared to 1.27% on December 31, 2025. Other real estate owned loans ("OREOs") totaled \$49.6 million, an increase of \$7.1 million from December 31, 2025.

The Corporation's commercial loan portfolio secured by real estate ("CRE") amounted to \$11.3 billion on June 30, 2026, with \$3.3 billion secured by owner-occupied properties (December 31, 2025 - \$11.2 billion and \$3.2 billion, respectively).

CRE NPLs amounted to \$66.1 million on June 30, 2026, compared with \$76.0 million on December 31, 2025. The CRE NPL ratios for the BPPR and Popular U.S. segments were 0.86% and 0.38%, respectively, on June 30, 2026, compared with 1.23% and 0.25%, respectively, on December 31, 2025.

The non-owner occupied CRE portfolio was \$5.6 billion at June 30, 2026, split between \$3.3 billion in BPPR and \$2.3 billion in Popular U.S. This portfolio is diversified across sectors: retail (32%), hotels (19%), and office space (12%) which together represent two-thirds of total non-owner occupied CRE exposure. Specifically, office space leasing accounts for just 1.7% (\$673.6 million) of the total loan portfolio, mainly comprising mid-rise properties with an average loan size of \$2.4 million, and is well diversified by tenant type.

Within CRE, the commercial multi-family portfolio is \$2.4 billion (approximately 6% of total loans), concentrated in New York Metro (\$1.3 billion), South Florida (\$651.9 million) and Puerto Rico (\$242.0 million) regions. In the New York Metro, there is no exposure to rent-controlled buildings and rent-stabilized units make up less than 40% of total units, with most originated after 2019.

In addition to the NPLs included in Table 18, on June 30, 2026, there were \$407.8 million of performing loans, mostly commercial loans, which in management's opinion, are currently subject to potential future classification as non-performing (December 31, 2025 - \$499.6 million).

[1] It is the Corporation's policy to report delinquent residential mortgage loans insured by FHA or guaranteed by the VA as accruing loans past due 90 days or more as opposed to non-performing since the principal repayment is insured. These balances include \$40 million of residential mortgage loans insured by FHA or guaranteed by the VA that are no longer accruing interest as of June 30, 2026 (December 31, 2025 - \$47 million). Furthermore, the Corporation has \$25 million in reverse mortgage loans which are guaranteed by FHA, but which are currently not accruing interest. Due to the guaranteed nature of the loans, it is the Corporation's policy to exclude these balances from non-performing assets (December 31, 2025 - \$27 million).

For the quarter ended June 30, 2026, total inflows of NPLs held-in-portfolio, excluding consumer loans, increased by \$145.3 million, when compared to the inflows for the same period in 2025. Inflows of NPLs held-in-portfolio at the BPPR segment increased by \$135.0 million, compared to the same period in 2025, mainly driven by higher commercial NPL inflows by \$134.3 million. Inflows of NPLs held-in-portfolio at the Popular U.S. segment increased by \$10.8 million from the same period in 2025, driven by higher commercial NPL inflows of the same amount.

Table 18 to Table 23 present the Corporation's inflows to NPLs for the quarters and six months ended June 30, 2026 and 2025.

### Allowance for Credit Losses Loans Held-in-Portfolio

The ACL represents management's estimate of expected credit losses through the remaining contractual life of the different loan segments, impacted by expected prepayments. The ACL is maintained at a sufficient level to provide for estimated credit losses on collateral dependent loans as well as loans modified for borrowers with financial difficulties separately from the remainder of the loan portfolio. The Corporation's management evaluates the adequacy of the ACL on a quarterly basis. In this evaluation, management considers current conditions, macroeconomic economic expectations through a reasonable and supportable period, historical loss experience, portfolio composition by loan type and risk characteristics, results of periodic credit reviews of individual loans, and regulatory requirements, amongst other factors.

The Corporation must rely on estimates and exercise judgment regarding matters where the ultimate outcome is unknown, such as economic developments affecting specific customers, industries, or markets. Other factors that can affect management's estimates are recalibration of statistical models used to calculate lifetime expected losses, changes in underwriting standards, financial accounting standards and loan impairment measurements, among others. Changes in the financial condition of individual borrowers, in economic conditions, and in the condition of the various markets in which collateral may be sold, may also affect the required level of the allowance for credit losses. Consequently, the business financial condition, liquidity, capital, and results of operations could also be affected. On June 30, 2026, the ACL amounted to \$784.8 million, a decrease of \$23.2 million from December 31, 2025. The decline primarily reflects improvement in consumer credit performance and favorable portfolio and macroeconomic developments.

The ACL for BPPR decreased by \$25.6 million as of June 30, 2026, compared to December 31, 2025. The decline was primarily due to a \$24.7 million reduction in reserves for consumer loans, mainly driven by improved credit quality in the auto and credit card portfolios. The reserve for commercial loans remained flat from December 31, 2025, reflecting the transfer to LHFS of the \$155.0 million NPL and related \$71.3 million charge-off, partially offset by higher reserves associated with NPL inflows during the quarter and loan growth. In PB, the ACL as of June 30, 2026 remained stable at \$92.5 million.

The Corporation's ratio of the allowance for credit losses to loans held-in-portfolio was 1.97% on June 30, 2026, compared to 2.05% on December 31, 2025. The ratio of the ACL to NPLs held-in-portfolio stood at 189.8%, compared to 162.1% on December 31, 2025.

Refer to **Note 8** to the Consolidated Financial Statements, for additional information on the Corporation's methodology to estimate its ACL, including probability weights assigned.

Tables 25 and 26 detail the allowance for credit losses by loan categories and the percentage it represents of total loans held-in- portfolio and NPLs. The breakdown is made for analytical purposes, and it is not necessarily indicative of the categories in which future loan losses may occur.

(d) Payout. The shares vested in accordance with this Section 2 will cease to be subject to the restrictions of Sections 3 and 4 of this Agreement and will be delivered to Executive as soon as administratively practicable, generally within 45 days following the date of vesting.

3. Termination of Award.

(a) Except as provided herein, Executive's rights in respect of the Award shall immediately terminate, and no Award shall be paid in respect thereof, if at any time prior to the Retirement Date Executive terminates his employment or at any time prior to the Vesting Date Executive materially breaches the Services Agreement.

(b) If the Corporation terminates Executive's employment for Cause prior to the Retirement Date, the Award shall be cancelled and the provisions under the Plan will apply.

5. Withholding, Consents and Legends.

(a) Executive shall be solely responsible for any applicable taxes (including, without limitation, income and excise taxes) and penalties, and any interest that accrues thereon, incurred in connection with the Award. The Corporation will withhold shares of Common Stock for the payment of taxes in connection with the vesting of the Award or upon the occurrence of any other event that, in accordance with applicable law, will generate a tax liability with regards to the Award. The Corporation will withhold shares of Common Stock with a value equal to the amount of taxes that the Corporation determines it is required to withhold under applicable laws (with such withholding obligation determined based on any applicable minimum statutory withholding rates). The Corporation will use the Fair Market Value of the Common Stock on the Vesting Date or such other date, as applicable, in order to determine the number of shares to be withheld. If Executive wishes to remit cash to the Corporation (through payroll deduction or otherwise), in each case in an amount sufficient in the opinion of the Corporation to satisfy such withholding obligation, Executive must notify the Corporation in advance and do so in compliance with all applicable laws and pursuant to such rules as the Corporation may establish from time to time, including, but not limited to, the Corporation's Insider Trading Policy.

(b) Executive's right to receive shares pursuant to the Award is conditioned on the receipt to the reasonable satisfaction of the Committee of any required documentation that the Committee may reasonably determine to be necessary or advisable.

6. Other Payments and Benefits.

(a) Short-Term Incentive for 2026. Subject to Section 7 of this Agreement, Executive will be eligible to receive a short-term cash incentive for 2026, approved by the Committee upon consideration of the Corporation's and the Executive's performance year-to-date, in the amount of \$1,620,000 (subject to applicable tax withholdings and deductions) (the "2026 Short-Term Incentive"). The approved amount corresponds to an annualized award equal to 202.5% times base pay prorated for the portion of the 2026 performance year during which Executive will be employed by the Corporation. The 2026 Short-Term Incentive will be payable within ten (10) days of the Effective Date (as defined in Annex 2) subject to Section 7 of this Agreement.

(b) Medical Coverage. Subject to Section 7 of this Agreement, upon Executive's retirement, Executive and his spouse will continue to be covered under the Corporation's health plan, at no cost to them, at the same coverage level as was in effect prior to the Retirement Date, for a period of up to 36 months after the Retirement Date (i.e., until up to August 31, 2029) (the "Medical Coverage Period"). In the event of Executive's death before or during the Medical Coverage Period, the continuation of health insurance coverage described above will cease, and his spouse will then be eligible to elect continuation coverage in accordance with the Consolidated Omnibus Budget Reconciliation Act ("COBRA") and the following paragraph will not apply.

Subject to Section 7 of this Agreement, Executive and his spouse will be offered the opportunity to continue their health plan coverage in accordance with COBRA starting on September 1, 2029. The continuation of the health plan coverage under this paragraph shall be pursuant to, and in accordance with COBRA. Pursuant to the separate notice of COBRA benefits which will be provided to Executive and his spouse, they shall complete the required forms to elect continuation of medical benefits under COBRA, if they wish to elect this benefit, and Executive agrees that he will be responsible to timely pay the full COBRA premiums, plus an additional 2% to cover administrative fees.

The benefits described in this Section 6(b) shall be referred to herein as the "Medical Benefits." The Award, the 2026 Short-Term Incentive, and the Medical Benefits are herein collectively referred to as the "Agreement Payments and Benefits."

(c) Equity Grants.

i) Restricted Stock: At various times during Executive's employment with the Corporation, he was awarded Restricted Stock under the Plan and the Popular, Inc. 2004 Omnibus Incentive Plan, as amended (collectively, the "Equity Plans"), with the most recent award granted in February 2026. Under the terms of the Equity Plans, the Corporation will accelerate the vesting of any unvested portion of the Restricted Stock as of the Retirement Date (excluding the Award, 41,928 shares in the aggregate), which will be delivered to him as soon as administratively practicable after

the Retirement Date. The Corporation will withhold shares of common stock with a value equal to the payment of the taxes that it determines it is required to withhold under applicable tax laws with respect to the award vesting, and shall cause the restrictions on the remainder of the shares to lapse. By accepting delivery of the shares, Executive acknowledges that he is subject to the Corporation's Insider Trading Policy.

ii) Performance Shares: At various times during Executive's employment with the Corporation, he was awarded Performance Shares under the Plan, with the most recent award granted in February 2026. Outstanding unvested Performance Shares (25,936 shares at target in the aggregate) will vest, respectively, in February 2027, February 2028 and February 2029 according to the terms and vesting schedule in the relevant Popular, Inc. Long-Term Equity Incentive Award and Agreement. Upon vesting, the Performance Shares will be delivered to Executive as soon as administratively practicable after the applicable vesting date. The Corporation will withhold shares of common stock with a value equal to the payment of the taxes that it determines it is required to withhold under applicable tax laws with respect to the award vesting. By accepting delivery of the shares, Executive acknowledges that he is subject to the Corporation's Insider Trading Policy.

Subject to the provisions hereunder, Executive acknowledges, agrees and warrants that he is not entitled to any other incentive payments, bonuses, equity grants, Restricted Stock, Performance Shares or other compensation under the compensation plans and policies of the Corporation.

(d) Retirement Benefits. Executive and the Corporation acknowledge and agree that Executive has accrued benefits under the Popular, Inc. Puerto Rico Savings and Investment Plan and the Popular, Inc. Puerto Rico Nonqualified Deferred Compensation Plan (the "Retirement Plans"), and that his benefits under the Retirement Plans shall be determined in accordance with the provisions thereof and any election related thereto. Any payments or benefits hereunder shall be excluded from eligible compensation for purposes of determining any deferral amounts or benefit values under the Retirement Plans.

(e) No Further Benefits, Payments, Etc. Executive acknowledges and agrees that except as expressly provided herein, his coverage under any compensation or benefit plan, program, policy or arrangement sponsored or maintained by the Popular Group shall cease and be terminated as of the Retirement Date. Executive further acknowledges and agrees that no payment made by the Corporation pursuant to this Agreement is subject to any employer matching obligation or any other employer contribution under any benefit or deferred compensation plan, whether or not any such payment is characterized as wages or other compensation.

## 7. Release and Waiver

In addition,

8. Restrictive Covenants.

(a) In consideration of the terms of the Award, Executive agrees to the restrictive covenants and associated remedies as set forth below, which exist independently of and in addition to any obligation to which Executive is subject under the terms of any other agreement with the Popular Group.

(b) For the period commencing on the Retirement Date and ending on the first anniversary of the Retirement Date, Executive will not do any of the following, either directly or indirectly or through associates, agents, or employees:

i) work or associate (including as a director, officer, employee, partner, consultant, agent or advisor) with or otherwise provide services to, or operate, manage or control in any way, a Competitive Enterprise performing the same or similar duties as those which were performed by Executive in the Popular Group during the 12-month period immediately preceding the Retirement Date. iii) solicit, participate in or assist in the solicitation of any of the Popular Group's customers serviced by Executive or with whom Executive had a Material Contact and/or regarding whom Executive received Confidential Information (as defined in the Popular Group's Code of Ethics) during the three-year period prior to the Retirement Date who were still customers of the Popular Group during the

"Material Contact" means interaction between the Executive and the customer within the three years prior to the Retirement Date which takes place to manage, service or further the business relationship.

The term "Solicit", when used in this section, will mean any direct or indirect communication of any kind regardless of who initiates it, that in any way invites, advises, encourages or requests any person to take any action; provided that such term will not be deemed to include solicitation by public advertisement media of general distribution (i.e., not targeted to present employees, consultants or customers of the Popular Group) without specific instruction or direction by Executive.

(c) Non-Disparagement. Executive and his spouse agree to refrain from performing any act, engaging in any conduct or course of action, or making or publishing any statements, claims, allegations or assertions which have or may reasonably have the effect of demeaning the name or business reputation of the Popular Group or any of its employees, officers, directors, agents or advisors in their capacities as such or which adversely affects (or may reasonably be expected to adversely affect) the best interests (economic or otherwise) of any of them. Notwithstanding the foregoing, Executive agrees to waive his right to recover monetary damages in connection with any charge, complaint or lawsuit filed by him or anyone else on his behalf (whether involving a governmental entity or not); provided that Executive is not agreeing to waive, and this Agreement shall not be read as requiring Executive to waive, any right he may have to receive an award for information provided to any governmental entity. Nothing herein shall be intended to prevent Executive from initiating, participating in, or offering testimony in proceedings related to sexual harassment claims or proceedings before the National Labor Relations Board or otherwise exercising his rights or supporting the rights of other employees pursuant to Section 7 of the National Labor Relations Act.

(d) If Executive breaches any of the terms of this Section 8, the Award shall be immediately and irrevocably forfeited for no consideration. This paragraph does not constitute the Corporation's exclusive remedy for violation of the restrictive covenant obligations, and the Corporation may seek any additional legal or equitable remedy, including injunctive relief, for any such violation.

9. [Reserved.]

10. No Rights to Continued Employment. Nothing in this Agreement shall be construed as giving Executive any right to continued employment by the Corporation or any of its affiliates or affect any right that the Corporation or any of its affiliates may have to terminate or alter the terms and conditions of Executive's employment.

11. Successors and Assigns of the Corporation. The terms and conditions of this Agreement shall be binding upon, and shall inure to the benefit of, the Corporation and its successor entities.

Any amendment of this Agreement shall be in writing signed by an authorized member of the Committee or a person or persons designated by the Committee.

Subject to the terms of this Agreement, the Award shall be subject to the terms of the Plan, including, but not limited to, the provisions of Section 8.4 related to dividends and voting rights. Cash dividends paid on the Award and on all of the Common Stock that may be subsequently acquired with such cash dividends, will be invested in the purchase of additional shares of Common Stock of the Corporation in accordance with the Popular, Inc. Dividend Reinvestment and Stock Purchase Plan; such shares are not subject to the restrictions and are immediately vested. The Award shall be held in custody by the Fiduciary Services Division of Banco Popular de Puerto Rico.

15. Governing Law and Jurisdiction. This Agreement shall be governed by and construed in accordance with the laws of the Commonwealth of Puerto Rico, without regard to principles of conflicts of laws. Any civil action or legal proceeding arising out of or relating to the Agreement will be brought exclusively in the courts of the Commonwealth of Puerto Rico.
